

Professional Cleaning Equipment

CraftiX series

Maximum health protection in the case of hazardous dusts.

The new certified safety vacuum cleaners by SPRiNTUS for dust classes L, M and H vacuum where hazardous dust is produced. Directly on the power tool. And all this with automatic filter cleaning with a consistently high level of suction power.

Good reasons for efficient dust control.

Where power tools are used, dust is often produced. Not any type of dust, but harmful fine particles. The dust should be absorbed where it is formed, directly on the power tool.

This is exactly what the robust SPRiNTUS safety vacuum cleaners are designed for. Whether on the construction site or in the workshop, they collect dusts that are hazardous to health at a constantly high level of suction power before it pollutes breathable air. In particular, fine dusts remain in the air we breathe in for a long time and can penetrate deep into the lung tissue. This can lead to asthma and other chronic lung diseases. For this reason, legislators also prescribe the use of certified safety vacuum cleaners at construction sites. With the CraftiX safety vacuum cleaners, you protect the user from these risks. In this way, sawing, drilling, cutting, milling and grinding work can be carried out efficiently and safely without hesitation.

SAFETY VACUUM CLEANERS

Your application is crucial.

What kind of safety vacuum cleaner is suitable for your application? The dust classes provide the answer to this question. Materials and their dusts are classified according to them and machines are certified, because the vacuum cleaners meet the corresponding requirements for dust control.

Dust class*	Maximum transmittance	Suitable for	Disposal
L	≤ 1,0%	Dusts with OEL** values > 1mg/m ³ Domestic dust, soil, lime	-
M	< 0,1%	Dusts with OEL** values ≥ 0,1mg/m ³ Wood, screed, primer coat and paint, plaster, cement, concrete, tile adhesive, paints such as latex and oil paints, quartz containing materials such as sand and pebbles	Low dust
H	< 0,005%	Dusts with OEL** values < 0,1mg/m ³ Carcinogenic dust, dust with pathogens, dust with bacteria	Dust free
Asbestos requirement	< 0,005%	Dusts with OEL** values < 0,1mg/m ³ Asbestos dust	Dust free

*according to the standard: IEC/EN 60335-2-69 **occupational exposure limit value

The table provides information about the maximum transmittance of a certified vacuum cleaner as well as the legal occupational exposure limit value of the dusts. Class-L dusts are classified as only slightly hazardous, those belonging to Class M are deemed hazardous and those belonging to Class H are regarded as extremely hazardous. No special regulations must be observed when disposing L-dusts. M-dusts, on the other hand, must be disposed of in a low dust manner and H-dusts as well as asbestos dusts must be disposed of in a dust free manner. Depending on the dust class, the use of fleece filter bags (Item-no. 102031) or special PE disposal bags (Item-no. 118138) and PE disposal bags asbestos (Item-no. 118169) for dust free disposal is recommended.

The SPRiNTUS safety vacuum cleaners at a glance.

For an efficient control of dusts in dust class L, M and H inclusive asbestos dusts, we offer you the CraftiX model series with a total of six safety vacuum cleaners. In all dust classes, you have the choice between a model with a container volume of 35 and 50 litres.

With the CraftiX models you ensure maximum health protection of the user. The efficient filter cleaning ensures a permanently free filter with a perpetually high level of suction power. This saves you time and money because filter cleaning takes place automatically without suction current and power interruption, even in the case of extreme amounts of fine dust.

- For dusts of dust class L (page 63)
- Antistatic preparation for connecting an optional antistatic hose (Item-no. 118143) to prevent electrostatic charges
- Patented HEPA 13 cartridge filter

- For dusts of dust class L, M and H as well as asbestos dusts (page 63)
- Standard anti-static equipment for extracting large amounts of fine dust
- Patented HEPA 14 cartridge filter
- The suction power is monitored by a warning device with a acoustic and visual signal

- For dusts of dust class L and M (page 63)
- Standard anti-static equipment for extracting large amounts of fine dust
- Patented HEPA 13 cartridge filter
- The suction power is monitored by a warning device with a acoustic and visual signal

Patented filter cleaning.

Dealing with hazardous dusts requires innovative product developments. The heart of the CraftiX is the patented HEPA 13 (dust class L, M) or HEPA 14 (dust class H) cartridge filter.

It consists of two independent filter chambers, which are cleaned one after the other. Suction current and suction power thus remain at a consistently high level even during cleaning, which guarantees permanent suction.

Filter cleaning is carried out by air backwashing and, thanks to the patented cartridge filter, ensures that the fine pores of the filter are freed from dust without leaving any residue. The maintenance and cleaning of the filter is no longer necessary and you save time and money.

Filter cleaning takes place automatically every 45 seconds. It is quieter than average and is therefore particularly user-friendly.

CraftiX advantages at a glance.

Whether you opt for an SPRiNTUS safety vacuum cleaner for dust class L, M or H, all six models have these innovative features.

Practical cable hooks for convenient transport.

Flat surface on the motor head with retractable carrying handle for mounting the optional adapter plate for tool cases. Item-no. 118150

Easy-to-clean blow-out filter.

Adjustable, foldable push bar for easy transport.

Integrated tool key for filter change. Item-no. 118124

Parking position for extra wide floor nozzle. Item-no. 102125

Patented filter cartridge.
HEPA 13 (dust class L, M). Item-no. 118100
HEPA 14 (dust class H including asbestos). Item-no. 118166

All-round elastic buffer edges.

Locking brakes prevent the vacuum cleaner from rolling away.

Maxi chassis with extra-large construction-site-compatible wheels, Ø 180 mm, and swivel castors, Ø 100 mm.

Dust-tight lockable connection nozzle for dust-free transport.

Power tool adapter for connecting power tools with suction devices of different diameters.

Ø 21 / 25 / 32 mm
Item-no. 118122

Ø 35 mm
Item-no. 118139

Handle for ergonomic carrying.

63,5 cm (35 litres)
77,0 cm (50 litres)

CraftiX controls.

The suction power of the four CraftiX models of dust classes M and H is monitored by a warning device. After setting the smallest diameter used in the suction harness, the user is warned by an acoustic and visual signal if the required air flow is not reached. This avoids increased dust pollution of breathable air.

The power tool can be plugged directly into the vacuum cleaner thanks to the integrated socket. Due to the automatic switch on and off, the vacuum cleaner is started automatically or stopped with a lag of 5 seconds.

CRAFTIX 35 M/H + 50 M/H

- 1 Selector switch hose diameter.
- 2 High safety due to warning LED and acoustic warning signal.

CRAFTIX 35 M/L/H + 50 M/L/H

- 3 On/off button automatic filter cleaning.
- 4 Standard operation with infinitely adjustable power regulation.
- 5 Automatic operation with connected power tool and infinitely variable power regulation.
- 6 Socket for power tools up to a maximum of 2.200 watts.
- 7 Customisation by way of printed logo..

Fleece filter bags (5 pieces). Item-no. 102031
 Disposal bags (5 pieces). Item-no. 118138

Disposal bags asbestos (5 pieces). Item-no. 118169

Limitless customisation.

Adapter plate for tool cases.

With only a single adapter plate from SPRINTUS you can attach tool cases of all common manufacturers to the Craftix (Systainer, metaBOX, Tstak Box, L-Boxx, MAKPAC). The optional adapter plate can be mounted and locked on the suction head without tools and ensures safe transport of the tool boxes. Despite the mounted tool case, all operating elements and accessory slots can be used without restriction.
