CAMIRA

Maximum performance for larger areas.

Battery operated, 24 V scrubber dryer. The machine, which is part of the 30-litre-class, convinces with a compact design and agility, which allows for extremely easy and efficient cleaning.
Equipped with two maintenance-free Sonnenschein gelbatteries with 50 Ah each, the running time is about 120 minutes and the machine cleans quickly and effectively medium-sized areas of up to 1600 m². At a low battery level, the optional ECO mode can be activated and extends the running time of the machine when needed to conclude the cleaning task. The swiveling suction bar ensures an excellent suction power even during change of directions and the standard brush with a working width of 43 cm is perfect for a variety of cleaning tasks. The voluminous waste water tank, which can easily be cleaned due to its accessibility, is equipped with a user-friendly drain hose. The freshwater tank can also be drained completely and makes the CAMIRA with its “brushdrop” at the push of a button, a standard on-board charger, and its excellent price-performance-ratio one of the most user-friendly machines in its class.

The CAMIRA is perfectly suited for medium sized areas of up to 1600 m². Battery runtime of up to 120 minutes.

The standard eco-mode guarantees a longer battery runtime and greater coverage. To start the eco-mode, push the SMART RUN button for two seconds until the display starts to blink.

With the SMART RUN button, you can easily activate all functions. Brush speed, suction and water supply.

On-/off button.

Battery runtime display.

Suction and water supply can be turned on and off individually.

User-friendly, ergonomic operating device with all functions clearly displayed.

Suction bar swivels automatically into the working direction.

Rubber castors ensure a safe cleaning performance along edges.

Standard waste water drain hose.

① Working height can be adjusted individually.
② Lift and release squeegee.

The extremely narrow construction design guarantees a perfect handling and unique maneuverability.

Freshwater can be drained completely and comfortably with the fast closure system.

Water amounts can be adjusted individually to floor type.

Large, easy to clean waste water tank.

Internal charging station with battery runtime display.

Due to the support wheel, the machine can be transported easily.
