MATRIX

Lockable cleaning trolley in two versions.

The MatriX, optionally with mop press or mop boxes, impresses with perfect workmanship, an extremely solid and robust construction, as well as an excellent price-performance ratio. The extra-large interior has three pull-out trays and a storage grid and offers versatile storage space for cleaning agents or other utensils. The lockable door ensures maximum security in the property and guarantees a modern and discreet appearance at all times. Thanks to the large rubberised 100 mm swivel castors, the MatriX can be moved effortlessly and safely at all times, even when fully loaded. The rear swivel castors have two individually lockable parking brakes and secure the MatriX against unintentional rolling away when parked.
