Backpack vacuum cleaner

BOOSTIX iGO
ZERO

We present to you our

Product catalog **2026**

We offer efficient, sustainable cleaning products for professionals. Our focus: innovation and ease of use.

With the new **VariX ZERO generation**, our modular design allows us to offer a tailor-made cleaning trolley for every field of application – from commercial cleaning to healthcare and the hotel industry. With up to 80% regranulate content and complete offsetting of CO₂ emissions, the series with a total of 13 different models is an extremely responsible product range.

The new **Titan Square series** is also impressive: with powerful eccentric technology and rectangular pads, thorough cleaning is possible even in hard-to-reach areas. Minimal vibrations and the robust design guarantee professional work with maximum comfort.

Another highlight is the **BoostiX iGO ZERO**, our lightweight cordless backpack vacuum cleaner 'Made in Germany'. Weighing only 4.4 kg, with an ergonomic carrying system and up to 90 minutes of runtime, it combines mobility, performance and sustainability at the highest level.

In addition, our proven **ZERO dry vacuum** cleaners are now available as standard in the sustainable ZERO version – manufactured in southern Germany, with up to 75% regranulate content and complete CO₂ compensation, while offering outstanding quality and functionality.

We are also focusing on sustainability with the opening of our new **assembly and logistics centre** in 2025. This has enabled us to double our production and logistics space at our headquarters in southern Germany and set new standards in energy efficiency and resource conservation.

Our clear focus on sustainability is also confirmed by the renewed award of the **EcoVadis Silver Medal** in April 2025. This recognition reflects our commitment to the environment, labour and human rights, ethics and sustainable procurement.

As a German company, we are proud to develop innovative cleaning solutions responsibly and hope you enjoy discovering our new products.

EcoVadis Silver Medal for SPRiNTUS

In April 2025, we were once again awarded the EcoVadis Silver Medal for our sustainability achievements. This result places SPRiNTUS among the top 15 percent of all companies assessed by EcoVadis in the previous 12 months.

Learn more about EcoVadis

EcoVadis provides globally recognised and trusted sustainability ratings for companies. More than 150,000 companies in over 185 countries and more than 250 industries are assessed by EcoVadis. The focus is on the areas of environment, labour and human rights, ethics and sustainable procurement.

SUSTAINABILITY

We bear responsibility.

As a highly innovative company, we take responsibility. Both each of our employees and we as a company. We care deeply about our environment, resources and society. That is why we strive every day to treat them in a sustainable and responsible manner. We take responsibility for economic, social, and environmental aspects. We take responsibility for our products, resources, production and supply chain, employees and society. For us, this means above all never standing still, but always striving for optimisation. In April 2025, we were once again awarded the EcoVadis Silver Medal for our successful sustainability management.

Our product range

Anyone who uses our professional cleaning equipment is already making a significant contribution to sustainability. This is because our product portfolio is designed for cleaning and thus for maintaining premises and objects. Our high-quality products are

energy-efficient, resource-saving and particularly quiet. At the same time, they achieve perfect cleaning results. Thanks to a multiple filtration system, which in our ERA ZERO model series includes a HEPA 13 filter cartridge, filter basket and filter bag, they guarantee extremely clean exhaust air and protect the user and everyone in the surrounding area.

Our products

When developing and designing our products, their outstanding quality and functionality are our top priorities. At the same time, we attach great importance to making them as sustainable and resource-efficient as possible.

Today, the proportion of recycled plastic in our dry vacuum cleaners and selected cleaning trolleys is already up to 80%. In future, we will consistently reduce the proportion of new plastics in our products and replace them with recycled plastics, while maintaining their quality and functionality.

We also offer selected products with a financial climate contribution. For these products, we have calculated the CO₂ emissions in accordance with the Greenhouse Gas Protocol and offset them by supporting internationally recognised climate protection projects. In addition to their compact, ergonomic and lightweight design, the durability of our extremely robust and resistant products also plays an important role in terms of sustainability.

Strict testing procedures ensure an extra-long service life for the motor. With the efficient and energy-saving 700-watt motors of the ERA TEC ZERO and ERA PRO ZERO, our customers benefit from an extremely low sound pressure level of only 49 [dB]. The powerful ERA iGO ZERO cordless dry vacuum cleaner, equipped with two 18-volt batteries and a 300-watt EC motor, has a sound pressure level of only 55 [dB]. Right from the product development stage, we make sure that repairs are easy to carry out. To this end, we also offer our customers fast spare parts

availability within 48 hours and a very wide range of spare parts. However, sustainability plays an important role not only in the development and production of products, but also in their disposal. That is why our products are made from recyclable materials.

Our resources

We pursue the goal of minimising our ecological footprint. Our company buildings are a prime example of modern, resource-efficient construction: photovoltaic systems, rainwater harvesting, intelligent building technology and the KfW-40 standard ensure maximum energy efficiency and resource conservation. The concept is complemented by our own e-charging stations, LED lighting and the use of 100% green electricity. By conducting more virtual meetings, we are reducing business travel to a minimum and thus also the greenhouse gas emissions caused by trains, cars and airplanes. We reduce product packaging to the bare

minimum, mainly use cardboard packaging material and avoid packaging waste from local suppliers as far as possible, for example by using special transport boxes. When delivering to our customers, we ensure that our parcel shipments are 100% climate-neutral.

Our production

As a German company, we are very proud to manufacture our top products at our headquarters in Germany. With the move to our new assembly and logistics centre, we have been able to expand our production and logistics area to 10,000 m². This guarantees us the space we need to grow over the next few years at our headquarters. In addition, the majority of the value added for our entire product range is generated at our German headquarters, from pro-

duct development to marketing and sales. We maintain long-standing relationships and reliable, honest partnerships with our suppliers. When selecting our suppliers, they undergo a careful review with regard to social and ecological factors.

Our employees

With indispensable expertise and commitment, our employees work hard every day for our company and our customers. They have made SPRINTUS and its high-quality, innovative products what they are today. As an expanding company, we bear responsibility for our employees, who are our company's most important asset. We guarantee secure jobs through successful products and responsible conduct, and do everything

we can to create the best possible working environment, whether in terms of training opportunities, work-life balance or the health of our employees. Ergonomic, modern workplaces are a must for us. Regular team-building activities and company events are important to us in order to create a positive working atmosphere. As a constantly growing company, we are delighted to have numerous long-standing employees.

Our society

Our business activities mean that we bear far more responsibility than just for SPRINTUS and our employees. Sustainable action has an impact that extends beyond company and national borders. That is why we take responsibility for society as a whole.

Our sustainability goals

For us, taking responsibility in ecological, social and economic terms means constantly striving for optimisation. We are not only a company that contributes financially to climate protection, but also offers sustainable products. Based on a holistic climate strategy, we were able to carry out a comprehensive analysis of the carbon footprint of our company and selected products. This was followed by measures to reduce and offset CO₂ emissions by supporting internationally recognised climate protection projects. In April 2025, we were once again awarded the EcoVadis Silver Medal for our sustainability achievements. We intend to continue to participate in this globally recognised sustainability rating in the future.

OUR CONTRIBUTION TO CLIMATE PROTECTION

For us, taking responsibility means developing and producing sustainable resource-saving products. We produce our top products at our company headquarters in Germany. Moreover, we make sure to use our resources as efficiently as possible and at the same time rely on renewable energies.

In our view, the move towards offsetting, in addition to avoiding and reducing emissions, is a crucial step in climate action. So we have determined the CO₂ emissions for our company and selected products. Based on this, we have taken measures to avoid and reduce them. We have been able to offset unavoidable emissions thanks to the support of internationally recognised carbon offset projects. In this context, we work together with  ClimatePartner.

We are a company with financial climate contribution.

Company with financial
climate contribution

[ClimatePartner.com/17872-2311-1001](https://climatepartner.com/17872-2311-1001)

We have calculated our company's carbon footprint in accordance with the guidelines of the Greenhouse Gas Protocol and fully offset it by providing financial support to global climate protection projects. The total emissions taken into account are divided into three categories (scopes)

Scope 1 consists of all emissions directly generated by our company, for example by our company's own vehicle fleet.

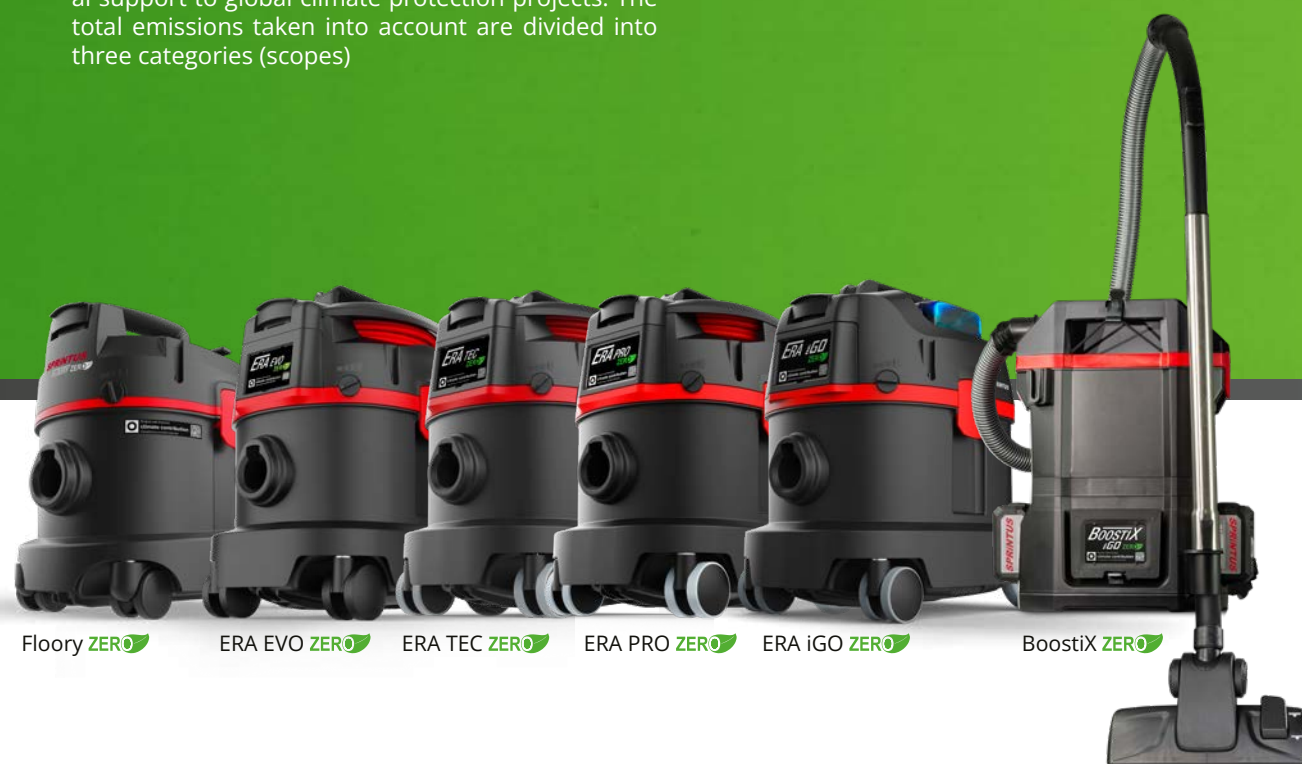

Scope 2 covers emissions arising from purchased energy such as electricity, whereas

Scope 3 covers indirect emissions such as the employees' commute to work.

We offer on request products with financial climate contribution.

For selected products, we have also calculated CO₂ emissions in accordance with the Greenhouse Gas Protocol using the 'cradle-to-customer plus end-of-life' approach. This takes into account all emissions from the extraction of raw materials and production to the disposal of the product and packaging.

Based on this, we offset unavoidable emissions by supporting internationally recognised climate protection projects. We take care of offsetting the corresponding emissions for you. The products are marked with the ZERO logo in the catalog.

We support certified climate protection projects

Greenhouse gases such as CO₂ are distributed evenly throughout the atmosphere. The concentration of greenhouse gases is therefore roughly the same everywhere on Earth. Emissions that cannot be avoided locally can therefore be offset by climate protection projects in other locations. These projects have been proven to reduce greenhouse gases and make an important contribution to combating global warming. To offset our CO₂ emissions, we support the following recognised climate protection projects certified according to international standards.

Renewable energies in Asia

One third of global greenhouse gas emissions are caused by the burning of fossil fuels such as coal and oil. These fossil fuels are not only finite, but also have a serious impact on the climate. In order to reduce CO₂ emissions and meet growing energy demands,

the promotion of renewable energy sources is essential. On the Asian continent, we support a portfolio of climate protection projects to promote the expansion of wind and solar energy, hydropower, and biogas and biomass.

Reforestation in Nicaragua

Forests are the basis of our existence and are among the most important CO₂ reservoirs on the planet. This project in eastern Nicaragua has reforested 2,361 hectares with more than 1 million plants of a native bamboo species and also protects 1,000 hectares of old forest. A severely degraded landscape has thus been transformed into a diverse ecosystem to curb global warming.

Energy costs calculator

With SPRINTUS dry vacuum cleaners, you can impress your customers with extremely low energy costs in their properties. You also automatically contribute to reducing CO₂ emissions. The ERA TEC ZERO and ERA PRO ZERO dry vacuum cleaners feature infinitely variable electronic power control. This means that they can be operated in ECO mode with a power consumption of only 250 watts.

Using a fleet of 100 ERA TEC ZERO or ERA PRO ZERO vacuum cleaners in ECO mode offers the following maximum savings potential compared to using 100 conventional 900-watt vacuum cleaners:

A fleet of 100 ERA TEC ZERO or ERA PRO ZERO units results in maximum **annual savings of 17,031 € and 15.6 tonnes of CO₂** compared to using 100 conventional 900-watt vacuum cleaners.

- * Source: Electricity price per kWh (as of 07/2025) according to the German Federal Association of Energy and Water Management.
- ** Source: Greenhouse gas emissions in the German electricity mix in 2024 according to the German Federal Environment Agency.
- *** Conventional vacuum cleaners with 900 watts.

ERA TEC ZERO / ERA PRO ZERO in ECO mode	
sample calculation:	
Number of vacuum cleaners per fleet	100
Power consumption (W)	250
Working days per year	220
Operating time per day (h)	3
Energy costs per kWh* (€)	0,40
CO ₂ emissions per kWh** (g)	363
Annual energy savings compared to conventional vacuum cleaner fleet***	42.900 kWh
Annual energy cost savings compared to conventional vacuum cleaner fleet*** (= energy savings * energy costs)	17.031 €
Annual CO ₂ savings* compared to conventional vacuum cleaner fleet	15,6 t

ARES

The entry-level of the professional dry vacuum cleaners.

- ① Tool-free exchange of motor filter
- ② Washable fleece filter basket
- ③ Tearproof, closable fleece filter for optimal dust intake.
- ④ Comfortable suction-hose-click-system
- ⑤ Large back wheels for high stability.
- ⑥ Standard 2in1 crevice-/upholstery nozzle

Two parking positions at the back of the machine for the crevice-/upholstery nozzle or the aluminium tubes.

The ARES is our compact entry-level dry vacuum. It is agile, high-quality, and stands out from other basic models. A high suction power and an efficient 700 watt engine are must-haves for SPRINTUS vacuum cleaners and allow the compact and reliable ARES to be a dynamic partner in the professional cleaning industry. Part of the extensive equipment are high quality aluminium tubes, which are in accordance with the high SPRINTUS quality standards. The robust, 2,0 m long Memory-Flex suction hose and a 8 m power cord, ensure an operating radius of 10 m. Due to the standard 2in1 crevice and upholstery nozzle, even hard to reach places and delicate areas can be cleaned. Thanks to its compact size and extensive equipment, the SPRINTUS ARES is a versatile dry vacuum, which can take on even larger cleaning challenges.

Standard parking position of the energy combi nozzle.

DRY VACUUM CLEANERS

FLOORY ZERO

Smart all-rounder at an attractive price.

ERA EVO ZERO

Versatile all-rounder with triple HEPA13 filtration.

ERA TEC ZERO

Top performance at an incredibly quiet 49 dB in ECO mode.

ERA PRO ZERO

Sets new standards as the world's first digital dry vacuum cleaner.

ERA iGO ZERO

Maximum mobility thanks to 36 V Li-ion design.

BOOSTIX iGO ZERO

Wireless, efficient cleaning in confined spaces

With its ZERO product line, SPiNTUS offers uncompromising sustainability, state-of-the-art technology and the highest quality standards. 'Zero emissions' is much more than just a promise: it is our commitment to consistently reduce CO₂ emissions and offset unavoidable emissions through compensation measures.

This is made possible by the use of up to 75% high-quality recycled plastic and consistent regional production. Our ZERO dry vacuum cleaners are manufactured at our company headquarters in southern Germany under the 'Made in Germany' seal of quality. Short delivery routes, cooperation with regional partners and resource-saving production play a decisive role here. The ZERO line combines environmental awareness, quality and efficiency in innovative, sustainable cleaning solutions.

For each ZERO product, we have determined the CO₂ emissions in accordance with the Greenhouse Gas Protocol using the 'cradle-to-customer plus end-of-life' approach. This approach takes into account all emissions from the extraction of raw materials and production to the disposal of the product and packaging. This enables us to offset unavoidable emissions by supporting internationally recognised climate protection projects. We work with ClimatePartner for this purpose. We take care of offsetting the corresponding emissions for you.

FLOORY ZERO

A top machine with an attractive price – swift, compact and reliable.

60 dB(A)

11 l

10 m

The powerful and energy-saving 700 watt motor ensures an excellent suction power at a low noise level and highly efficient dirt absorption with its 11 l container volume.

As with all other SPRINTUS products, the design and development are of high quality and practical in every detail. With our FLOORY ZERO, the user receives a perfect all-round package, a reliable and economic partner for hard floors and carpet. Aluminium tube, elastic bumpers and easy emptying. The 10 m power cord and the 2 m step resistant suction hose without memory effect ensures maximum maneuverability.

HEPA13 fleece filter basket as standard for bagless vacuuming.

Item-no. 114118

HEPA 13 fleece filter bag.

Item-no. 106061

Four accessories slots on the back. Parking position for optional turbo brush or parquet nozzle.

Maximum ergonomics: with a weight of only 4,2 kg, the Floory can comfortably be carried with one hand.

Large foot switch for turning on and off without bending down.

Lockable, voluminous cable hook.

Large fixed castors Ø 85 mm and sturdy swivel castors Ø 50 mm with impact protection.

ERA EVO ZERO

Versatile all-rounder with triple HEPA13 filtration.

The quiet ERA EVO ZERO is versatile, compact, reliable and a true powerhouse. The integrated cable rewind makes the safe and practical storage of the signal-red 10m power cord possible. If required, you can change the cable in just a few simple steps and without using any tools.

High-quality filter media, such as the standard fleece filter basket, the HEPA 13 filter bag, and the HEPA 13 filter cartridge guarantee clean blow-out air at all times and are particularly suitable for those who suffer from allergies or for the cleaning of sensitive areas, such as hospitals, nursing homes and kindergartens. The extra-large, tear-resistant 9-litre fleece filter bag guarantees a high volume of dirt absorption and long working intervals, without frequent and annoying filter bag changes. The power regulation that can be adjusted on the device allows for the ERA EVO ZERO to be adapted to any floor covering.

And what's best: already for small order quantities, we equip the ERA EVO ZERO with your logo and strengthen your company image and brand.

TIP: HEPA 14 accessories optional for all ERA ZERO models

ClimatePartner.com/17872-2210-1003

DRY VACUUM CLEANERS

The ERA TEC ZERO is consistently continuing the innovative ERA series, thereby guaranteeing top performance at an incredibly quiet 49 dB in ECO mode. The ERA TEC ZERO can therefore be used around the clock, at any time of the day, even in busy and sensitive areas, such as hotels or in office rooms. Should it be necessary, the spare filter bag compartment saves unnecessary legwork and loss of valuable working time should no replacement filter bags be close at hand.

The standard USB port and the optional storage box allow you to charge your mobile phone directly on the vacuum cleaner without setting aside your mobile anywhere on the property or losing sight of it. Alternatively, the storage box is also suitable as a practical beverage holder, for cleaning agents, or for carrying microfiber cloths. The fill level indicator in red indicates that the filter bag needs to be changed or clogging.

Features:

Additional equipment for ERA EVO ZERO

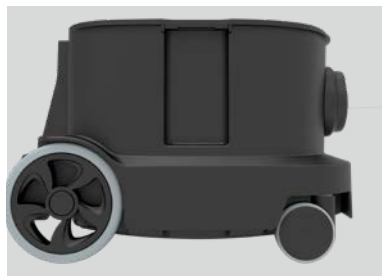

The blue operation LED turns red when a blockage occurs.

DRY VACUUM CLEANERS

With the first-time digitisation of commercial dry vacuum cleaners, the ERA PRO ZERO dry vacuum cleaner by SPRINTUS sets new benchmarks in professional cleaning.

The interactive touch display can be customised with your logo using the SPRINTUS APP. In this way, new customers can be acquired, and the corporate design can be adapted and underscored. A language selection (DE, ENG, FR, IT) can be made. In the event of a fault, solution suggestions are shown

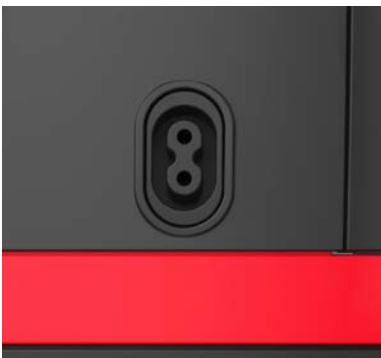

on the display. In combination with the integrated Bluetooth interface, important device data such as operating hours, daily run time or location. Data can be transferred into the cloud-based fleet management and connected to commonly used ERP systems. Run times can be checked with the touch of a button, and property calculations can be adapted. In the display, additional data can be stored and called up, e.g. property, user and customer data. The user can call up spare parts drawings, user manuals, data sheets and other device data at any time.

Features:

Additional features compared to ERA TEC ZERO

Interactive touch display with current date and time.

Socket for optional electric vacuum brush.

3in1 Charging cable.

ERA PRO ZERO

Fleet management Web portal

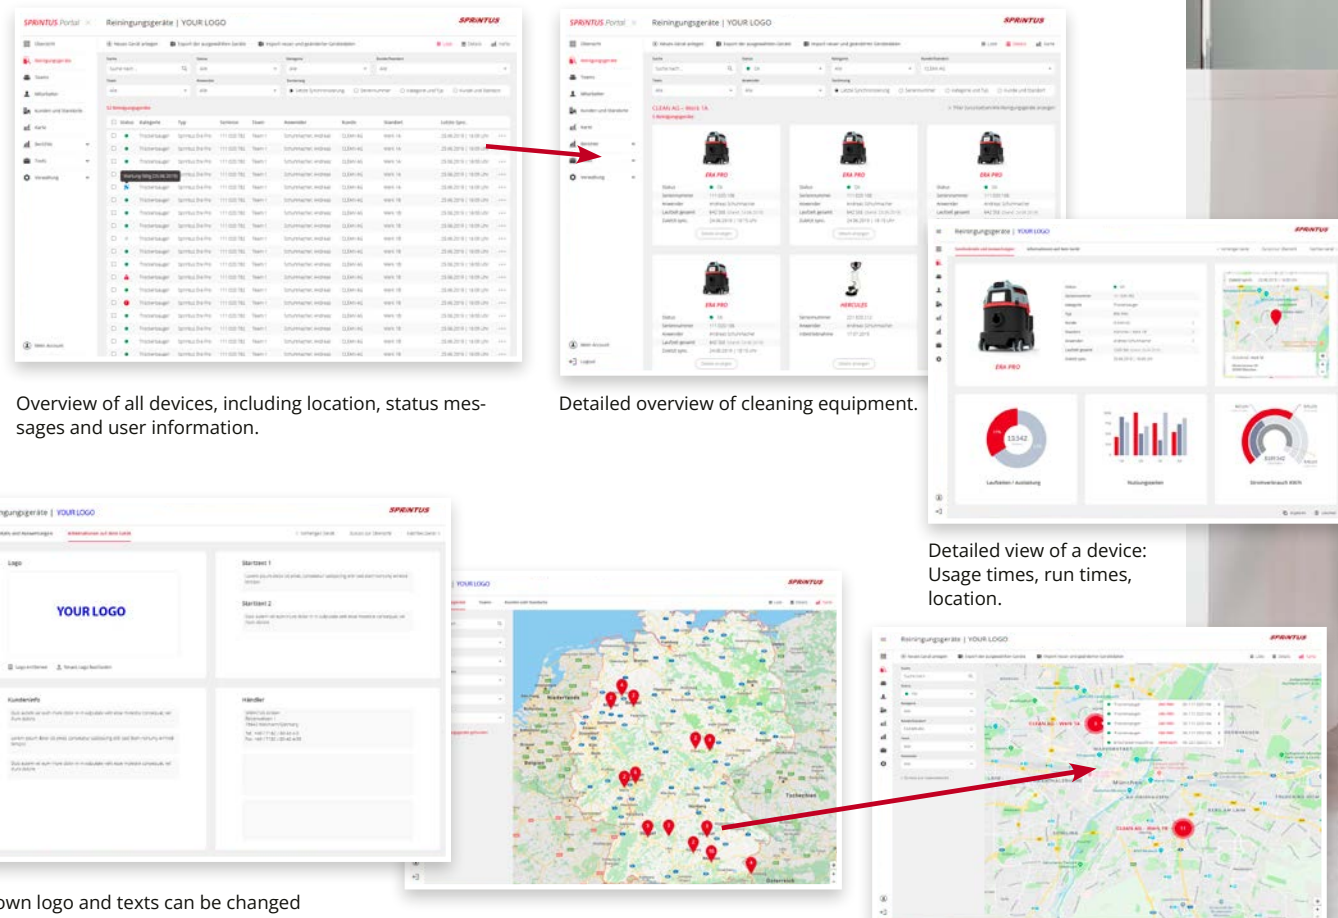

SPRINTUS browser-based fleet management system allows you to centrally manage all ERA PRO ZERO dry vacuum cleaners and keep an eye on everything at all times. In the general overview, all basic information concerning your ERA PRO is shown in a compact manner. You can call up data relevant for each ERA PRO ZERO, such as location, property names, users, daily run times, maintenance dates, such as the DGUV V3 for example, or faults at any time. With the synchronisation via the SPRiNTUS APP, all data is displayed in real time in the web portal.

Reports

In the detail view, you have access to all relevant reports concerning your ERA PRO. This helps you to make the right decisions and keep your fleet in optimal operational condition. Other cleaning equipment located on the property can be created and be centrally managed via the web portal.

Your advantages at a glance:

- Overview of the status and run times of all devices
- Faults and maintenances are displayed individually
- Visualisation of the devices by map on a property basis
- Extensive software functions and reports
- Professional, customisable interface for all common ERP systems

Overview of all devices, including location, status messages and user information.

Detailed overview of cleaning equipment.

Detailed view of a device: Usage times, run times, location.

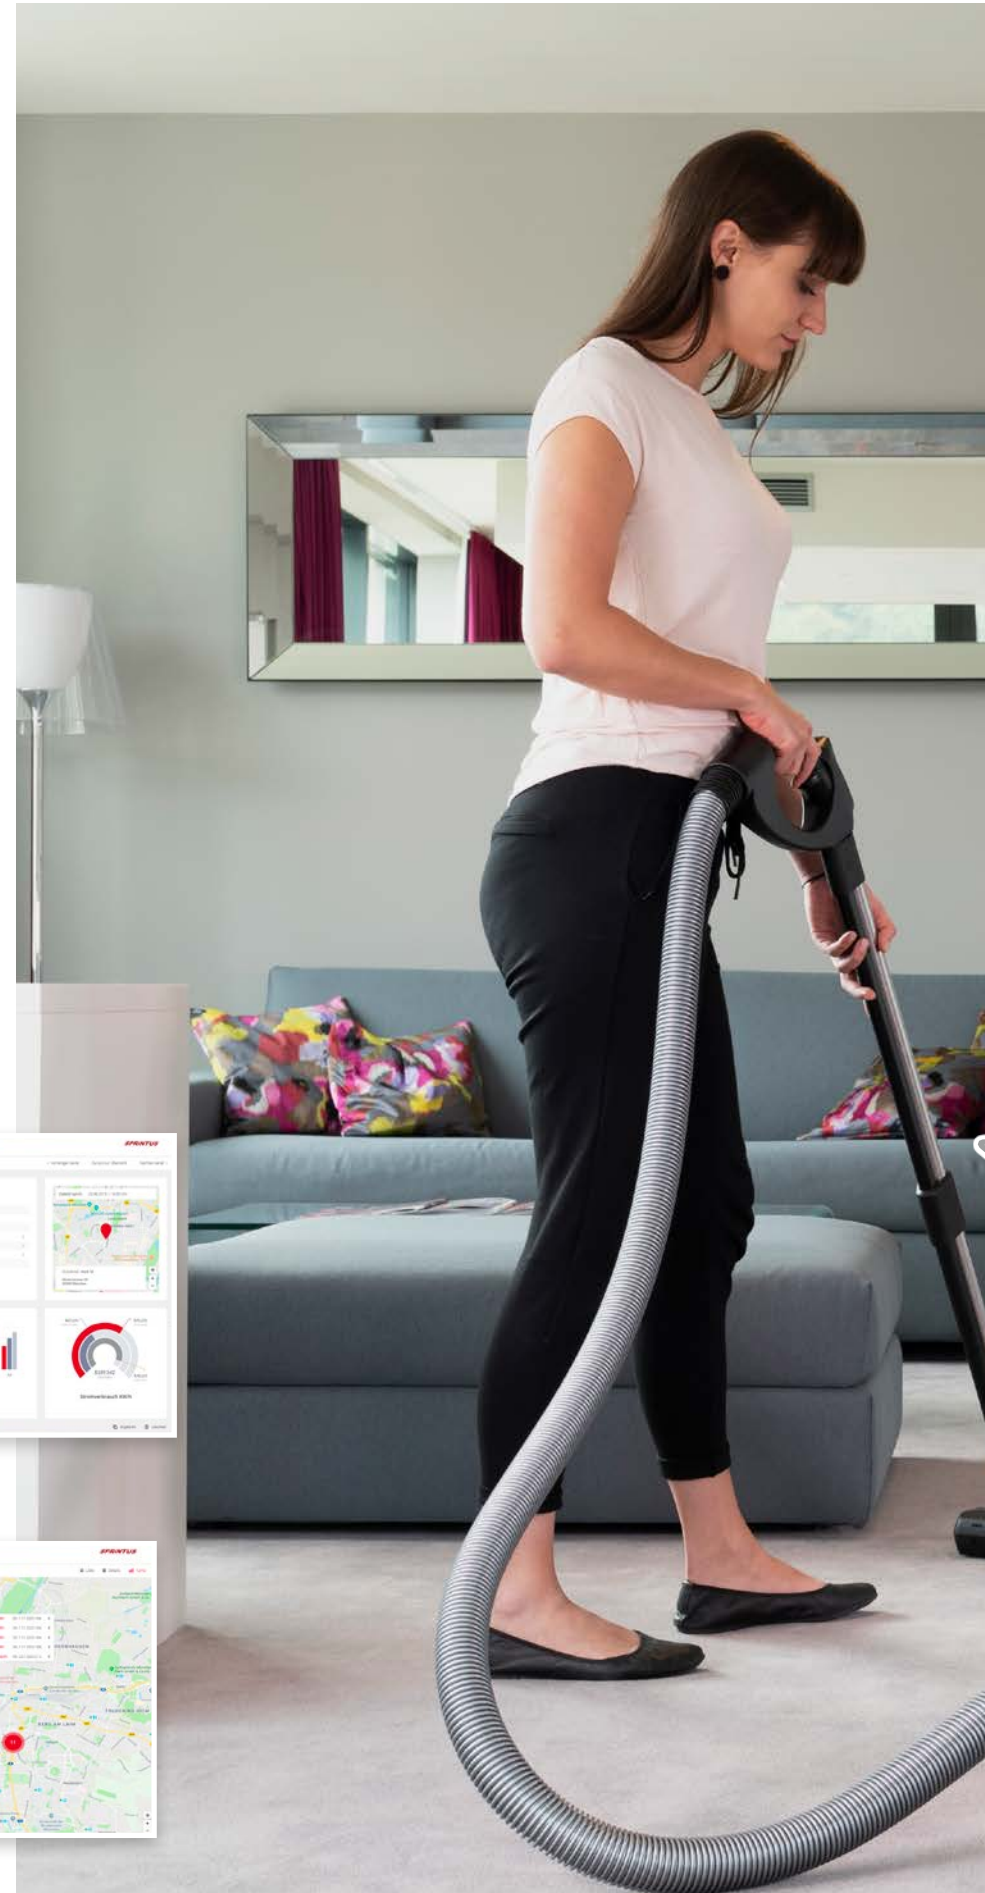

Cleaning equipment, teams, customers, and locations can be displayed on the map.

Detailed map view.

Your own logo and texts can be changed directly on the device.

ERA PRO ZERO

Comfort SET

The new generation of brush vacuum cleaners:

Unbeatable comfort! The ERA PRO ZERO in combination with the electric suction brush achieves excellent results on carpets and carpeted floors. Thanks to its permanent-magnet electric drive and high-level vacuum, it cleans deeply and gently. The carpet is literally combed out by the rotating brush and dirt is transported towards the suction nozzle and sucked in. Even heavy dirt in the carpet, such as hair or threads, is absorbed. With the remote control on the Ergo handle, you can conveniently switch the brush on and off at the touch of a button. Thanks to the stainless-steel telescopic tube, the working height can be conveniently adjusted to any user and makes it possible to work efficiently and free of fatigue.

The image shows an ERA PRO ZERO set including an electric vacuum brush.

TIP: ERA PRO ZERO-Set including an electric vacuum brush. Item-no. 117041

ERA iGO ZERO

Cordless, 58 [dB] silent dry vacuum cleaner as 36 V Li-Ion version

Our goal: 'Zero emissions' – avoiding, reducing and completely offsetting CO₂ emissions.

Product with financial
climate contribution
ClimatePartner.com/17872-2309-1001

The **ERA iGO ZERO** cordless dry vacuum cleaner guarantees maximum flexibility and mobility. The powerful 36 V Li-Ion system combines autonomous, cable-free operation with the unique features of the ERA ZERO model series, setting new standards in professional cleaning. Equipped with two 18 V batteries and a 300 W EC motor, the ERA iGO ZERO delivers excellent cleaning performance. The 7.5 Ah batteries connected in series allow for up to 90 minutes of uninterrupted operation, making it ideal for extended cleaning tasks. The power output is continuously adjustable between 150 and 300 watts directly on the device, allowing the suction performance to be easily adapted to any type of flooring. A clear display on the motor head keeps you informed at all times about the current power level and battery status, ensuring optimal control during use. The ERA iGO ZERO also impresses with its extremely low sound pressure level of just 62 dB, or 58 dB in

ECO mode, making it perfectly suited for noise-sensitive and high-traffic environments such as hotels, offices, hospitals, and kindergartens. High-quality HEPA 13 filter media ensure clean exhaust air at all times, making the vacuum cleaner ideal for allergy sufferers and for use in sensitive areas. The extra-large, tear-resistant 9-litre fleece filter bag offers a high dirt absorption capacity and enables long working intervals without frequent and inconvenient bag changes. Additionally, the ERA iGO ZERO enhances your brand visibility and corporate image thanks to a customizable logo badge on the device. This premium vacuum cleaner is proudly **MADE IN GERMANY**, manufactured at the SPiNTUS headquarters in southern Germany.

**Optional: Horsehair
parquet nozzle 360mm,
item no. 111207**

58-62 dB(A)

5,9 kg

up to 90 Min

Features: Additional features compared to ERA TEC ZERO

2 x 5 Ah battery for up to 60 minutes of runtime
2 x 7.5 Ah battery for up to 90 minutes of runtime.

Display: Indicating current power level and battery status

The two batteries installed on the motor head create a low center of gravity, which significantly reduces the vacuum cleaner's risk to tip over.

Handle including an extendable carrying strap.

BACKPACK VACUUM CLEANER

With the **BoostiX ZERO** series, SPiNTUS is setting new standards in professional cleaning. The backpack vacuum cleaner is available in a cordless 36 V Li-ion version or with a power cord. The **BoostiX iGO ZERO** cordless backpack vacuum cleaner impresses with its extremely low weight of only 4.4 kg, high efficiency and long motor life thanks to its brushless 300 watt EC motor. With a runtime of up to 90 minutes, the device is ideal for long working hours in confined or hard-to-reach areas such as public transport, cinema and theatre auditoriums or stairwells.

The triple HEPA 13 filter system ensures clean exhaust air, making the backpack vacuum cleaner ideal for use in healthcare facilities, nurseries or any other sensitive area.

Features:

Four storage slots for accessories.

Ergonomic carrying system, tool-free changeable.

Control panel with on/off button and stepless power regulation.

Multifunctional carrying strap.

Low centre of gravity with optimum weight distribution.

Plug-in and lockable power cable with integrated cable security.

MEDUSA

For quick, cordless interim cleaning, indoors and outdoors.

Industrial battery-powered sweeper for the quick, quiet and cordless cleaning of all surfaces, indoor and outdoor. The full floating main cylinder brush individually adapts to any surface, whether hard surface or carpet.

Suggested Use

Ideal for entryways of all kinds, hallways, staircases, driveways, warehouse and office areas, airports and train stations.

The Medusa is a battery-powered machine developed specifically with professional users in mind. It has a working width of 37 cm, including its two inwards-rotating side brushes.

Objects with a diameter of up to 2 cm can be easily vacuumed during operation. With its light weight and compact dimensions, the Medusa is designed for hard-to-reach spaces. The side brushes enable a complete and thorough cleaning along edges and even in the smallest corners. The powerful Lithium-Ion battery (without memory effect) with 10.8 V and 1.5 Ah allows an operation time of approx. 45 minutes per battery. A second, optional battery can be directly stored and carried on the machine itself. A quick-charging unit with a charging time of only 90 minutes is included with purchase.

Highlights:

- ▶ Large foot pedal for activation without bending over
- ▶ Main cylinder brush and side brushes can be replaced without the use of tools
- ▶ Aluminium telescopic handle for an optimum work position
- ▶ Rubber wheels leave no traces, even on sensitive surfaces
- ▶ Enormous waste collection tray with 2 litres capacity
- ▶ Changeable bristled rim on the bottom of the housing
- ▶ Low noise volume, and therefore excellent for use during business hours
- ▶ Space-saving storage position
- ▶ Compact, light, and easy-to-handle for any user
- ▶ **Tip** Can be carried on the cleaning trolley

MADE IN GERMANY

Tool-free replacement of main cylinder brush and side brushes is possible.

Rotating cornerbrushes for perfect results in corners and edges.

Especially large waste collection tray with a volume of 2 litres.

Cordless, efficient, compact and agile.

ARTOS

High-quality, powerful wet / dry vacuum cleaner at a fair price.

Suggested Use

The vacuum cleaner is perfect for cleaning buildings, industrial facilities and workshops due to its power, compact size and robust design.

The wet / dry vacuum cleaner Artos in the 30-litre class impresses thanks to its high quality and sensational value for money. Innovative features, such as the cyclone water separation system with a reliable floater system, sets the Artos clearly apart from the other wet /dry vacuum cleaner models in the entry-level class. The wide chassis and

long wheelbase make the Artos a particularly agile machine, which can be manoeuvred easily over the surface to be cleaned. The 360 mm wide floor nozzle included in the basic configuration is extremely user-friendly and can be converted from a wet floor nozzle to a dry floor nozzle by simply exchanging the rubber strips for brush strips without the use of tools. High-quality components, such as the strong stainless-steel container and the 1200 Watt motor, make the Artos a robust and reliable partner in professional cleaning.

Technical Data:	
Voltage	220-240 V / 50 Hz
Max. Power	1200 W
Sound pressure level	72 dB(A)
Volume flow	48 Litres / sec.
Max. negative pressure	230 mbar*

WATERKING series

With 260 mbar suction power at 70 L/Sec, the two models **Waterking** and **Waterking XL** are extremely powerful and enable excellent area performance. Thanks to the mechanical output regulator, suction power can be adapted to any kind of flooring. With the integrated blower function, filters and work benches can be blown clean, or wet surfaces can be blown dry. On-device storage for the hose, power

cord and accessories, as well as a parking position for the tube and an ergonomic handle, ensure optimal handling and make the two devices fit for professional use. A high-performance power socket located on the head allows for the use of further cleaning machines directly through the vacuum.

Highlights

- ▶ Outstanding water/dirt intake
- ▶ Consistent separation of intake air and processed air
- ▶ Reliable floating gauge even reacts during heavy foam growth
- ▶ Cyclone water separation system
- ▶ Rotary joint on the suction hose for hindrance-free maneuvering
- ▶ Ideally suited for dry vacuuming in combination with the fine dust filter cartridge and the fleece filter bag
- ▶ Mess-free waste disposal thanks to the closeable fleece filter bag
- ▶ Robust chassis with large swivel casters and wheels

Features

The blower function is integrated into the back side of the device and is activated by simply inserting the suction hose.

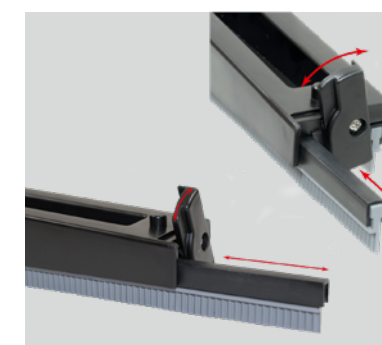

A powerful electrical outlet enables the use of additional cleaning tools directly through the vacuum cleaner.

Thanks to the mechanical output regulator, suction power can be adapted to any kind of flooring.

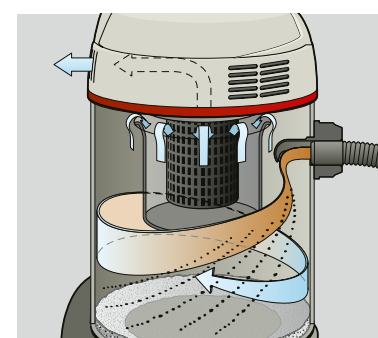

Always close to the action: Four accessory slots and a park position for attachments on the back of the vacuum

Easy, tool-free change of rubber lips.

Patented water separation system.

Due to the twist of the intake nozzle, the spray-fog is consequently diverted along the inner container wall. Additional filters are no longer necessary. - ▶ Large, easy-to-remove push bar
- ▶ Drain hose for comfortably emptying the container
- ▶ Rubber-coated swivel casters and back wheels
- ▶ High volume flow rate thanks to 38 mm hose and tube diameter

Waterking

Waterking XL

Additional equipment for Waterking XL

Wastewater drain hose for easy emptying of the container.

The locking brake can be operated from either side and prevents the vacuum cleaner from rolling away.

Sturdy chassis of impact-resistant plastic.

Large rubber-coated swivel casters Ø 100 mm and back wheels Ø 180 mm.

Tool free removable push bar.

Accessories

Professional metal floor nozzle 450 mm for the toughest jobs.
Item-No. 113250

Antistatic suction hose, 3 m.

N series

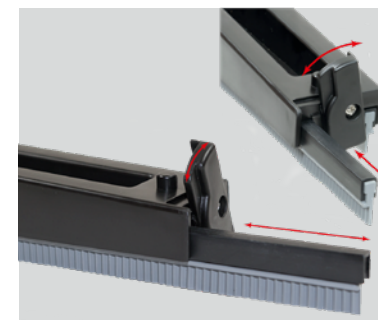

Powerful wet/dry vacuum cleaners with individually switchable turbines.

The N series from SPRINTUS consists of three powerful wet and dry vacuum cleaners with 55-to-80-litre container volumes. They are equipped with two to three individually adjustable turbines. This makes them extremely powerful and adaptable to any application. The fine dust filter cartridge, fleece filter basket and the 450 mm extra-wide floor nozzles included in the accessories ensure an impressive area output. The sturdy chassis with metal casters and large rubbercoated wheels ensures problem-free working, even on sensitive surfaces. The robust stainless steel wet and dry vacuum cleaners **N 55/2 E** and **N 77/3 E** are used by facilities services, in maintenance and the food service industry.

They feature a convenient tilting function that allows the container to be emptied quickly and easily. Also available is an optional 650 mm gangway nozzle for wet surfaces, which can be mounted on the chassis and operated from the backside of the device.

The **N 80/2 K** is equipped with a particularly durable plastic container and is made for tough use in industry and trade. Its integrated wastewater drain hose makes it especially suitable for frequent use on wet and large surfaces.

Features

Easy, tool-free change of rubber lips.

The fine dust cartridge, fleece filter basket and fleece filter bag guarantee an extra high filtration rate.

Larger rubber coated wheels for high comfort and silent running, even on sensitive floors.

Highlights

- ▶ Individually adjustable turbines
- ▶ 15 m power cord for efficient work
- ▶ Robust chassis, stable swivel casters, rubber-coated wheels
- ▶ Complete set of accessories
- ▶ Stainless steel push handle
- ▶ Extra-wide floor nozzles 450 mm

N 55 / 2 E

KETOS series

Comes with 2-power settings:
Economy and Turbo.

The two KETOS models are bursting with strength. These are extremely powerful, modern and commercial professional vacuum cleaners of top class and thus are made for heavy daily use of contractors, industry, maintenance service and food service. The KETOS series connected high performance motors attain a suction power of 300 mbar at a volume flow of 70 litres/sec. per motor. They create a kind of turbo charging effect, which triggers the machine's intense power spectrum at a sound pressure level of only 69 dB(A) while operating at full capacity.

With the **KETOS 56/2 E** and **KETOS 81/2 K**, you work sustainably and efficiently at the cutting-edge of technology and can choose between the Economy

and Turbo settings according to the demand. The reliable, patented cyclone water separation system assures optimal water intake. Furthermore, the KETOS models are equipped with a blower function on the back side of the machine, which is activated simply by inserting the suction hose, with a robust undercarriage, metal swivel casters and rubber-coated wheels, a large lockable cable hook and an additional blower hose. The filter cartridge is easily removable. Thus, the machine's fine dust collection class can be upgraded to EPA12.

Features

The two devices are equipped with an easily removable filter cartridge on the exhaust side, upgradable to EPA12.

Clever solution:
Large, lockable cable hook, thanks to its swivel joint.

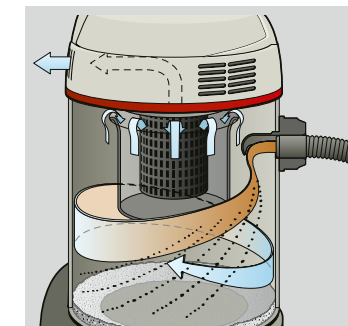

Switch on the face of the machine lets you choose between Economy and Turbo settings. Thanks to the mechanical output regulator, suction power can be adapted to any kind of flooring.

Highlights

- ▶ Extremely high-performance with 300 mbar suction power
- ▶ Economy and Turbo power settings
- ▶ Mechanical power regulation
- ▶ Low noise generation, only 69 dB(A)
- ▶ Robust chassis, stable metal swivel casters, rubber-coated wheels
- ▶ Systematically separated cool and processed air
- ▶ All accessories stored at the backside of device
- ▶ Push bar and vacuum tube made of stainless steel
- ▶ Cyclone water separation system
- ▶ Unique, lockable cable hook
- ▶ Blower function

Patented water separation system.

Due to the twist of the intake nozzle, the spray-fog is consequently diverted along the inner container wall. Additional filters are no longer necessary. The reliable floater system even reacts during heavy foaming. Cooling air slots located on the side ensure the consistent separation of cooling and processed air.

Cyclone insert for wet vacuuming.

HEPA 13 filter cartridge for dry vacuuming.

KETOS 56 / 2 E

- ▶ 55 litres container volume
- ▶ Solid stainless steel container
- ▶ Emptying by tipping the body or via the wastewater drain hose

KETOS 81 / 2 K

- ▶ 80 litres container volume
- ▶ Wear-resistant plastic container
- ▶ Emptying via the wastewater drain hose
- ▶ Complete drainage of wastewater

Additional equipment for KETOS 56 / 2 E

The KETOS can either be tilted or conveniently emptied via the waste-water drain hose.

Optional for the KETOS 56/2 E
The 650 mm gangway nozzle can be conveniently operated by foot pedal from the rear of the vacuum cleaner.

HYDROX series

The new pump vacuums.
Compact. Powerful. Reliable.

MADE IN
GERMANY

PUMP / FIRE SERVICE VACUUMS

NEW FOR 2026

HydroX Works
Powerful for
industry and general repairs

HydroX Fire
Professional equipment for fire
brigades and technical relief services

The **HydroX** series redefines performance in the field of pump vacuums and is ideal for removing large volumes of water in the event of flooding, water damage or fire damage. Whether **HydroX Works** for industrial use or **HydroX Fire** for emergency services – both models combine maximum suction power with a powerful pump and compact design. The HydroX series with a 40-litre tank capacity is manufactured in Germany, ensuring the highest quality and reliability. Both suction pumps offer an optimally balanced ratio of suction and pumping power, ensuring efficient and continuous operation. The dry-running pump features a quick-change system and can be easily removed, cleaned or replaced.

The new, large collection basket and the proven cyclone system ensure effective separation of coarse particles and foam. A 10 m dirty water hose with a diameter of 38 mm and the universal C-pipe connection for fire brigade and technical relief services hoses optimally convert the high pump performance into actual delivery performance. A PRCD personal protection switch and safe sockets (IP54 for HydroX Works 113010 & IP68 for HydroX Fire 113050) provide enhanced safety. Robust locking brakes, practical cable hooks, a flexible push bar and convenient accessory storage also ensure maximum ease of use.

VS

HYDROX WORKS

- ▶ IP54 socket*
- ▶ plastic fittings
- ▶ Max. delivery head of 9 metres
- ▶ Max. flow rate (pump) of 17,000 L/H

HYDROX FIRE

- ▶ IP68 socket*
- ▶ Aluminium C-coupling
- ▶ Aluminium floor nozzle
- ▶ Stainless steel suction tubes
- ▶ Increased pump power of 750 W
- ▶ Max. delivery head of 10 m
- ▶ Max. flow rate (pump) of 19,000 L/H

* only 113010 or 113050

Advantages:

Well balanced suction and pump performance: The HydroX Works achieves a pump power of 550 W with a maximum pump flow rate of 17,000 l/h and a delivery head of up to 9 m. The HydroX Fire scores with 750 W, a pump delivery rate of up to 19,000 l/h and a maximum delivery head of 10 m. This ensures continuous and efficient operation, even under demanding conditions.

Efficiently-designed filter basket: Featuring small perforations in the lower section and wide openings at the top, it allows continuous drainage while effectively separating sludge and large particles. Its large capacity enables extended operation, and the basket can be easily removed for emptying and stands securely on the floor.

Features:

Efficient quick-change system:
Pump can be easily and quickly removed, cleaned and replaced

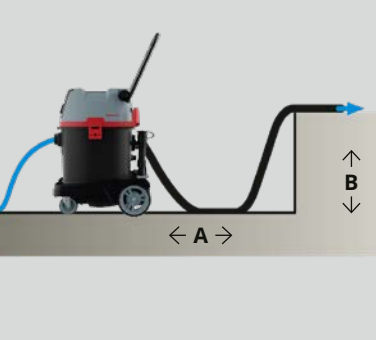

Optional adapter plate: for tool-free attachment of tool cases from all common manufacturers

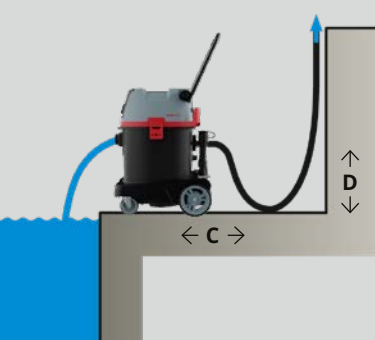

Practical carrying handle: retractable for mounting the optional adapter plate for tool cases

Flexible push bar: adjustable and foldable for easy transport

Maximum pumping distance:
HydroX Works: A 60 m, B 4 m
Hydrox Fire: A 60 m, B 5 m

Maximum delivery head:
HydroX Works: C 10 m, D 9 m
Hydrox Fire: C 10 m, D 10 m

Operating principle:

Fields of application:

firefighting operations

flood operations

water damage

flat roof renovation

XCONNECT

Intelligent automatic start/stop
Simple. Clean. Safe.

NEW FOR 2026

With the innovative Xconnect appliance control system, nothing stands in the way of automatic start/stop when working with cordless tools! It saves a considerable amount of time, as the extraction of fine dust from the power tool starts automatically as soon as the cordless tool starts working. This means that in future it will not only be possible to automatically extract dust from corded tools, but also from cordless tools with machines from any manufacturer. The intelligent transmitter is attached to the power tool and detects whether it is switched on or off. The transmitter transmits the signal wirelessly to the radio-controlled socket. This activates the vacuum cleaner – for a dust-free working environment and maximum health protection. The radio-controlled socket can be controlled by up to three different transmitters.

Technical Data:	
Operating range	max. 30 m
Frequency band	2.400-2.483 MHz
Ambient temperature	0°C to +35°C
Storage temperature	-30°C bis +70°C
Protection class	IP44
Radio-controlled socket outlet	
Power supply	230 V~
Switching cable max	3600 W
Transmitter	
Power supply	1x CR2032 battery

FLOORY L XC

Clean work,
smart vacuuming

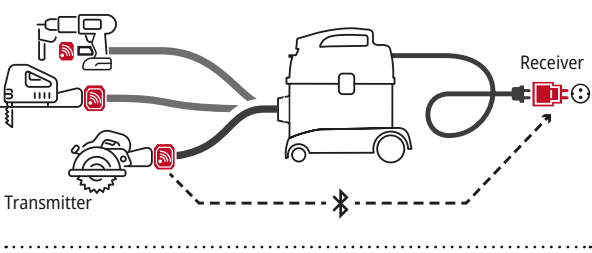

Your perfect construction site companion: the set consisting of the Floory in dustclass L dry vacuum cleaner, Xconnect automatic start/stop and rubber sleeve makes dust-free working easier than ever. The compact vacuum cleaner impresses with its high suction power, quiet operation and low weight. Thanks to the intelligent Xconnect automatic system, suction starts as soon as the power tool is switched on – for greater speed and health protection. With the universal rubber sleeve, the Floory XC L can be connected to any power tool – ideal for electricians, carpenters or trade fair constructors.

Telescopic suction tube 0,6 - 1,0 m, stainless steel		117228
Suction hose, 2,5 m, antistatic		109111
Accessories overview, see page 40 and 106		

Highlights

- ▶ **Universal application**
For cordless and corded tools, compatible with all manufacturers
- ▶ **Reliable connection**
Stable radio control – up to 30 m – without Wi-Fi, without cloud
- ▶ **Automatic vacuum cleaner activation and deactivation**
Starts/stops the vacuum cleaner when the tool is switched on/off
- ▶ **Quick retrofitting**
Plug-and-play: no conversion, ready for use in a few minutes
- ▶ **High flexibility**
One receiver can be controlled with up to 3 transmitters
- ▶ **Protects health**
Efficient dust minimisation throughout the entire work process
- ▶ **Sustainable & cost-efficient**
No need to purchase a new vacuum cleaner or tool
- ▶ **Ready for immediate use**
No need to activate the transmitter after a long break
- ▶ **Reliable sensor technology**
Sensitive sensor technology for very weak vibrations & special sensor technology for reliable switching even with large machines with strong vibrations

Up to three transmitters can be connected to one receiver.

CRAFTIX & CRAFTIX XC series

Maximum health protection in the case of hazardous dusts.

Certified safety vacuum cleaners by SPRiNTUS for dust classes L, M and H as well as asbestos extract dust where health-hazardous particles are generated. Directly at the power tool. And all this with automatic filter cleaning at a consistently high level of suction power.

NEW FOR 2026

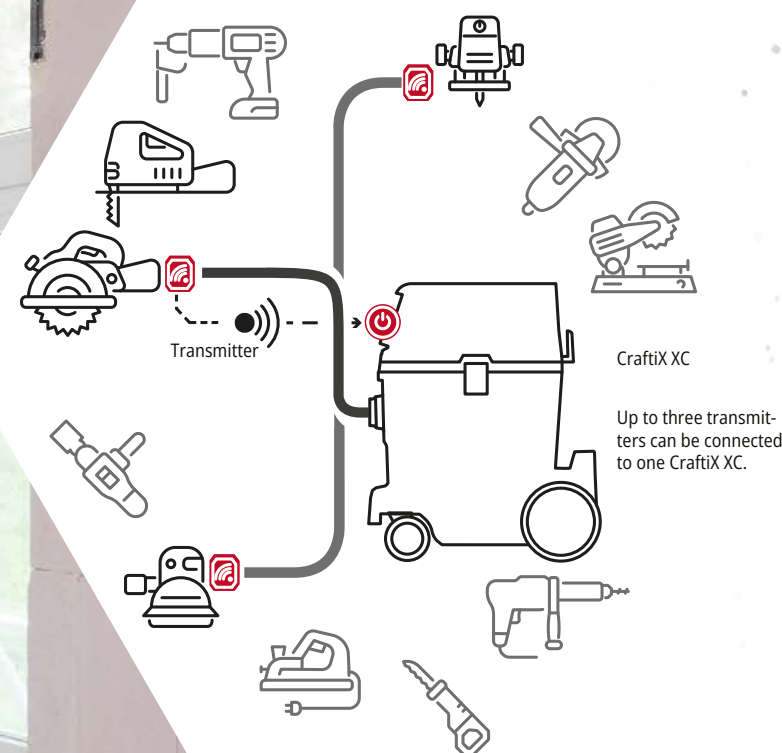

Innovative safety vacuum cleaner with integrated radio-controlled socket

The innovative CraftiX range from SPRiNTUS has been extended with the CraftiX XC model variant. The wireless module integrated in the safety vacuum cleaner ensures automatic start/stop when working with cordless tools and provides maximum health protection.

How CraftiX XC works

Once the transmitter has been attached to the power tool and paired with CraftiX XC, the transmitter communicates wirelessly with the integrated radio module. As soon as the power tool is switched on or off, the vacuum cleaner's automatic start/stop function is activated. This ensures easy and convenient dust control – when working with both corded and cordless tools.

Highlights

- **Safety vacuum cleaner with integrated radio module**
Provides automatic start/stop when working with cordless and corded tools
- **Reliable connection with up to 3 transmitters**
Stable radio control – up to 30 m – without Wi-Fi, without cloud

The SPRiNTUS safety vacuum cleaners at a glance.

For efficient control of dusts in dust classes L, M and H including asbestos, we offer you the CraftiX (XC) model series with a total of six safety vacuum cleaners – each available with or without an integrated wireless module. In all dust classes, you can choose between a model with a container volume of 35 or 50 litres.

Dust class L

- For dusts of dust class L
- Antistatic preparation for connecting an optional antistatic hose (Item-no. 118143) to prevent electrostatic charges
- Patented HEPA 13 cartridge filter

Dust class M

- For dusts of dust class L and M
- Standard anti-static equipment for extracting large amounts of fine dust
- Patented HEPA 13 cartridge filter
- The suction power is monitored by a warning device with a acoustic and visual signal

Dust class H

- For dusts of dust class L, M and H as well as asbestos dusts
- Standard anti-static equipment for extracting large amounts of fine dust
- Patented HEPA 14 cartridge filter
- The suction power is monitored by a warning device with a acoustic and visual signal

Good reasons for efficient dust control.

Where power tools are used, dust is often produced – not just any dust, but hazardous fine dust that poses serious health risks. This type of dust should be extracted directly at the source: right at the power tool.

That's exactly what the robust SPRINTUS CraftiX (XC) safety vacuum cleaners are designed for. Whether on construction sites or in workshops, they reliably extract harmful dusts with consistently high suction power before they can contaminate the breathable air. Fine dust particles, in particular, remain suspended in the air for extended periods and can penetrate deep into lung tissue. This can lead to asthma and other chronic respiratory diseases. For this reason, the use of certified safety vacuum cleaners is legally required on construction sites. With the SPRINTUS (CraftiX XC) safety vacuum cleaners, you protect users from these risks. Sawing, drilling, cutting, milling, and grinding tasks can be carried out efficiently and safely – without compromising health.

Your application is crucial.

What kind of safety vacuum cleaner is suitable for your application? The dust classes provide the answer to this question. Materials and their dusts are classified according to them and machines are certified, because the vacuum cleaners meet the corresponding requirements for dust control.

Dust class*	Maximum transmittance	Suitable for	Disposal
L 	≤ 1,0%	Dusts with OEL** values > 1mg/m3 Domestic dust, soil, lime	—
M 	< 0,1%	Dusts with OEL** values ≥ 0,1mg/m³ Wood, screed, primer coat and paint, plaster, cement, concrete, tile adhesive, paints such as latex and oil paints, quartz containing materials such as sand and pebbles	Low dust
H 	< 0,005%	Dusts with OEL** values < 0,1mg/m3 Carcinogenic dust, dust with pathogens, dust with bacteria	Dust free
 Asbestos requirement	< 0,005%	Dusts with OEL** values < 0,1mg/m3 Asbestos dust	Dust free

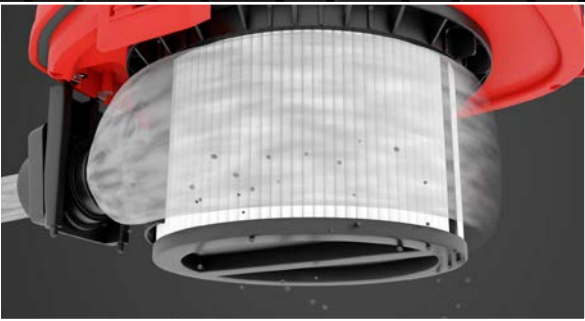

*according to the standard: IEC / EN 60335-2-69

**occupational exposure limit value

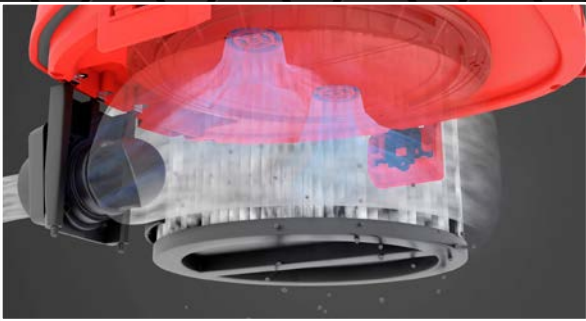

The table provides information about the maximum transmittance of a certified vacuum cleaner as well as the legal occupational exposure limit value of the dusts. Class-L dusts are classified as only slightly hazardous, those belonging to Class M are deemed hazardous and those belonging to Class H are regarded as extremely hazardous. No special regulations must be observed

when disposing L-dusts. M-dusts, on the other hand, must be disposed of in a low dust manner and H-dusts as well as asbestos dusts must be disposed of in a dust free manner. Depending on the dust class, the use of fleece filter bags (Item-no. 102031) or special PE disposal bags (Item-no. 118138) and PE disposal bags asbestos (Item-no. 118169) for dust free disposal is recommended.

Patented filter cleaning.

Dealing with hazardous dusts requires innovative product developments. The heart of the CraftiX is the patented HEPA 13 (dust class L, M) or HEPA 14 (dust class H) cartridge filter.

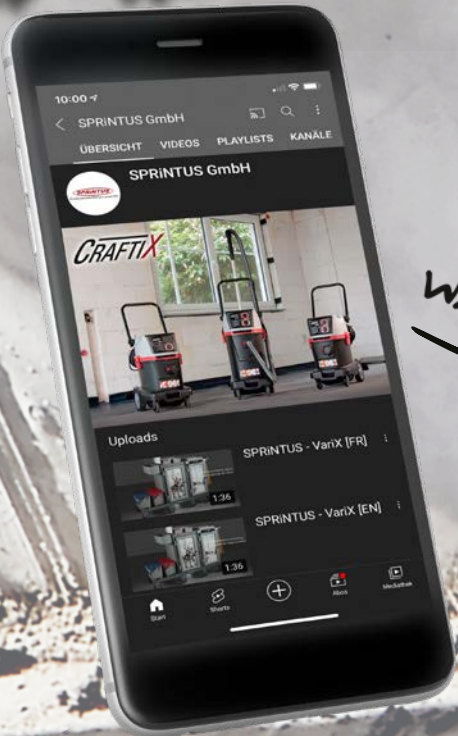

It consists of two independent filter chambers, which are cleaned one after the other. Suction current and suction power thus remain at a consistently high level even during cleaning, which guarantees permanent suction.

Filter cleaning is carried out by air backwashing and, thanks to the patented cartridge filter, ensures that the fine pores of the filter are freed from dust without leaving any residue. The maintenance and cleaning of the filter is no longer necessary and you save time and money.

Filter cleaning takes place automatically every 45 seconds. It is quieter than average and is therefore particularly user-friendly.

CraftiX (XC) advantages at a glance.

Whether you choose an SPRINTUS safety vacuum cleaner in dust class L, M or H, with or without an integrated radio module, all models have these innovative features.

Practical cable hooks for convenient transport.

Flat surface on the motor head with retractable carrying handle for mounting the optional adapter plate for tool cases. Item-no. 118150

only CraftiX XC: Integrated radio module for activating the automatic start/stop function.

Easy-to-clean blow-out filter.

Adjustable, foldable push bar for easy transport.

Integrated tool key for filter change. Item-no. 118124

Parking position for extra wide floor nozzle. Item-no. 102125

Patented filter cartridge. HEPA 13 (dust class L, M). Item-no. 118100
HEPA 14 (dust class H including asbestos). Item-no. 118166

All-round elastic buffer edges.

Locking brakes prevent the vacuum cleaner from rolling away.

Maxi chassis with extra-large construction-site-compatible wheels, Ø 180 mm, and swivel castors, Ø 100 mm.

Dust-tight lockable connection nozzle for dust-free transport.

Power tool adapter for connecting power tools with suction devices of different diameters.

Ø 21 / 25 / 32 mm
Item-No. 118122
Ø 35 mm
Item-No. 118139

Handle for ergonomic carrying.

Limitless customisation.

With your personal logo sign, your brand is visible everywhere. Not only do you increase your brand awareness, but you can also label devices with inventory numbers or assign them to individual users.

Adapter plate for tool cases.

With only a single adapter plate from SPRINTUS you can attach tool cases of all common manufacturers to the CraftiX (Systainer, metaBOX, Tstak Box, L-Boxx, MAKPAC). The optional adapter plate can be mounted and locked on the suction head without tools and ensures safe transport of the tool boxes. Despite the mounted tool case, all operating elements and accessory slots can be used without restriction.

CraftiX controls.

The suction power of CraftiX (XC) models of dust classes M and H, including asbestos, is monitored by a warning device. After setting the smallest diameter used in the suction harness, the user is alerted by both an acoustic and visual signal if the required airflow falls below the permissible level. This prevents increased dust exposure in the breathable air.

Corded power tools can be plugged directly into the vacuum cleaner thanks to the integrated socket. The automatic start/stop function ensures the vacuum cleaner starts automatically and stops with a five-second delay.

CraftiX (XC) 35 M/H, 50 M/H

- ❶ Switch for hose diameter selection
- ❷ High safety due to warning LED and acoustic warning signal.

CraftiX (XC) 35 L/M/H, 50 L/M/H

- ❸ On/off button automatic filter cleaning.
- ❹ Standard operation with infinitely adjustable power regulation.
- ❺ Automatic operation with connected power tool and infinitely variable power regulation
- ❻ Socket for power tools up to a maximum of 2.200 watts.
- ❼ Customisation through logo cards.

Your advantages at a glance.

- ▶ Consistently high suction power even during automatic filter cleaning
- ▶ Maximum health protection thanks to automatic start/stop when working with cordless and corded tools
- ▶ Patented cartridge filter with two independent filter chambers
- ▶ Very quiet automatic cleaning of both filter chambers every 45 seconds
- ▶ Large range of accessories and accessory storage directly on the device
- ▶ Just a single adapter plate for attaching all common tool cases to the CraftiX
- ▶ Unlimited customization with your personal logo sign

EM17 EVO

Maximum Smoothness,
Fully Equipped.

Suggested Use

The **EM 17 EVO** is perfect for hard daily use with its robust planetary gear.

The 10-litre water tank ensures that work is performed quickly and comfortably. Due to the tool-free disc exchange, the EM 17 EVO can be adapted to all surfaces without long waiting times. In combination with the Queen Bonnet Pad, unparalleled cleaning results can be achieved on carpeted floors. For optimal results in case of intense and tough dirt, the device weight can be increased with the optional 14 kg additional weight.

Due to the large rubberised wheels, the machine does not leave any marks, even on vulnerable surfaces.

Features

- Robust planetary gearbox
- Integrated 10-litre freshwater tank
- Tool-free change of brush and disc

HERCULES

Powerful, extremely robust and quietly running single disc machine.

Suggested Use

Intensive cleaning of all hard surfaces and carpeted surfaces.

The Hercules single disc machine is designed to offer an extremely silent running. It is a robust and easily operated single disc machine in the upper mid-range segment.

With its large, user-friendly and ergonomic control, the machine can easily be steered and is perfectly suited for intensive, basic and preservation cleaning. The powerful and maintenance-free steel planetary gear with 175 rpm drive power always has sufficient reserves to rapidly and thoroughly clean all hard surfaces as well as to shampoo textile surfaces. With its high entire weight of 48 kg, and the two optional 14 kg additional weights, the machine's total weight can easily be increased to 76 kg at any time as required. Ideal conditions for thorough cleaning of stubborn stains and dirt.

The Hercules offers you a durable, reliable and powerful all-rounder for flexible application on all surfaces with an outstanding price/performance ratio. The machine is equipped as standard with the full range of accessories, including a 12 litre fresh water tank, pad holder, as well as one shampooing and one scrubbing brush.

Features

- Maintenance-free steel planetary gear
- Integrated 12 litre freshwater tank
- Tool-free changing of brushes and discs
- Robust, ergonomic handlebar

HERCULES Duo Speed Pro

Robust single disc machine with two working speeds

optionally with 180/360 revolutions / min.

Two in one

The **Hercules Duo Speed Pro** combines the advantages of a slow and fast runner in only one device. Owing to its two working speeds, it is the perfect solution for efficient, fast and cost-effective cleaning and polishing.

As low-speed machine operated with 180 rpm, our new Hercules Duo Speed Pro is ideal for basic cleaning of a wide variety of floor coverings. When changing the working speed to 360rpm, our robust single-disc machine also enables the crystallization of natural stone floors as well as polishing of various floor coverings. The two working speeds can be

easily switched with the integrated button on the motor head.

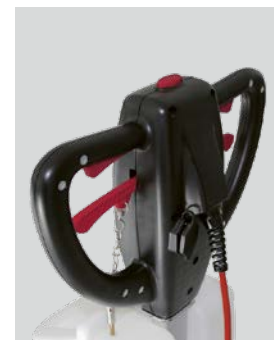

The Hercules Duo Speed Pro is not only extremely versatile but also provides the same advantages and features of our well-established and high-quality Hercules single disc machine. The large, user-friendly and ergonomic control element makes the Hercules Duo Speed Pro easy to operate.

The Hercules Duo Speed Pro offers optimal conditions for thorough cleaning of heavily dirtied surfaces. In addition by choosing the Hercules Duo Speed Pro, you do not only benefit from an excellent price-performance ratio but also from a long-lasting, reliable and powerful single disc machine, flexibly applicable on all surfaces. The machine is supplied with standard equipment including a 12 litre fresh water tank, a pad driving plate, and a shampooing and scrubbing brush.

Duo Pad.
Item-No. 201077

Power Pad.
Item-No. 201076

Uniquely, the 10 litres fresh water tank sits directly on the machine and therefore ensures an optimum contact pressure, easy handling and perfect cleaning results. The user can remove the tank in just a single action, and work efficiently beneath objects or in edge zones thanks to the low ground clearance of just 10 cm.

The standard convenient advantage: The fresh water tank, equipped with a stretch hose, can be simply topped up with water directly at the tap.

With its racy and powerful 1,500 Watt motor and the maintenance-free steel planetary gearing with 175 rpm, the ZEUS is extremely powerful and yet incredibly quiet. It is easy to operate and also enables inexperienced users to work safely, in an energy-efficient and fatigue-free manner. Added to this, it is simple to transport and space-saving when stored, because the draw bar can simply be folded down fully.

If necessary, the Zeus can be flexibly upgraded from a 54 kg net weight to a maximum 64 kg. Thanks to the special latching element, brushes and discs can be switched in seconds without tools.

The Zeus offers the maximum in quality, reliability and durability, and frequently proves to be a smart solution provider in everyday work.

EEM 13 R

Handy orbital machine –
light, manoeuvrable, efficient.

EEM 13 R Set with pump tank.
Item-No. 202005

Accessories:
Pump tank.
Item-No. 202037

Suggested Use

Bathrooms, baths, changing rooms, stairs, hard surfaces and carpeting.

The **EEM 13 R** orbital single disc machine is ideal for cleaning small surfaces, niches and corners due to its compact construction and simple operation.

With its nominal weight of 12.7 kg, it is also suited for use on staircases. The eccentric transmission ensures effective cleaning and problem-free, safe maneuvering without effort or strain. The large rubber-coated wheels allow for convenient transport without leaving traces on the freshly-cleaned surface.

You can clean hard surfaces, buff stone and parquet flooring, and even shampoo carpeting with the included accessories.

Features

- Powerful eccentric transmission
- Compact design for easy handling
- Safe maneuvering without effort
- Complete accessories for all types of flooring

Technical Data:

Voltage	220-240 V / 50 Hz
Max. Power	250 W

TITAN

High-performance orbital machine with excellent cleaning results and safe operation.

The orbital technology combines two types of motion to achieve a higher mechanical cleaning effect while reducing the use of chemistry and protecting the environment. The interplay of eccentric and rotating movements generates a special efficient cleaning pattern and thus differs from classic single-disc machines, which perform a pure rotational movement. In terms of smooth running, the orbital method also has a very positive effect on handling and makes it possible to drive the machine in a safe

and fatigue-free manner at all times. Even inexperienced users can quickly become familiar with the Titan and achieve excellent work results in the shortest possible time. The areas of application in basic and maintenance cleaning, polishing, and scrubbing on all floor coverings (carpet, stone, PVC, wood, safety tiles) are almost limitless.

Advantages of the orbital machine in comparison to a single-disc machine:

- less water
- less chemicals
- less time
- less effort
- contact surface area 100 % (see right)

Thanks to significantly higher mechanical cleaning effect!

Tilting drawbar for increasing the contact pressure.

Motor protection cover protects the motor from moisture.

Excellent stairway mobility and stability.

Optional additional weight, 12 kg. Item-no. 207119

Technical Data:	
Voltage	220-240 V / 50 Hz
Max. Power	1100 W
Sound pressure level	56 dB(A)
Brush speed approx.	60 rpm
	1500 Oscillations/min.

TITAN SQUARE

Easy to use.
Simple cleaning close to the edge.

Titan Square
Easy handling
at a great price

Titan Square XL
up to 45 g/cm²
contact pressure

Titan Square iGO
Maximum mobility
thanks to Li-Ion power
available from March 2026

The new eccentric machine series combines powerful cleaning performance with maximum user-friendliness. Thanks to its rectangular pads, the **Titan Square** clean corners and edges easily – no extra work needed. The innovative eccentric technology ensures excellent mechanical action with minimal vibration, allowing the machine to be guided smoothly, safely and without fatigue – even by inexperienced users.

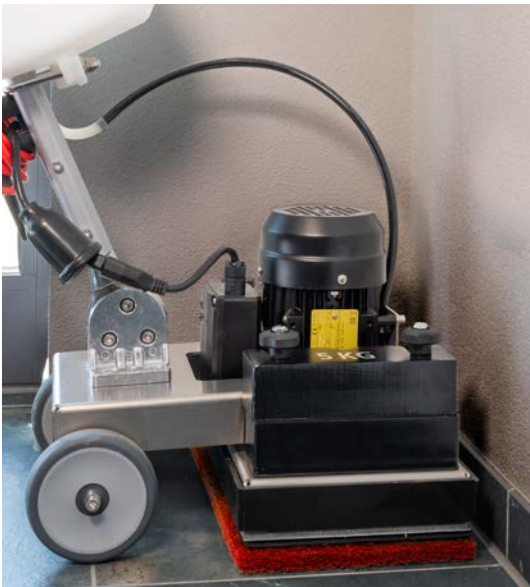

Whether for basic or maintenance cleaning, the Titan Square delivers perfect results on almost all floor coverings. The additional weights of 20 and 30 kg included in the scope of delivery ensure high contact pressure, while robust metal and brass components guarantee a long service life. Two corded machines are available – the Titan Square and **Titan Square XL** – as well as a cordless machine for maximum flexibility – the **Titan Square iGO**.

Rectangular pads: perfect edge and corner cleaning without manual reworking

Features:

Ergonomic: Handle element with robust switches and integrated cable protection

Pre-Pad protection: prevents damage to the hook-and-loop fasteners on the machine, for example when parking without a pad

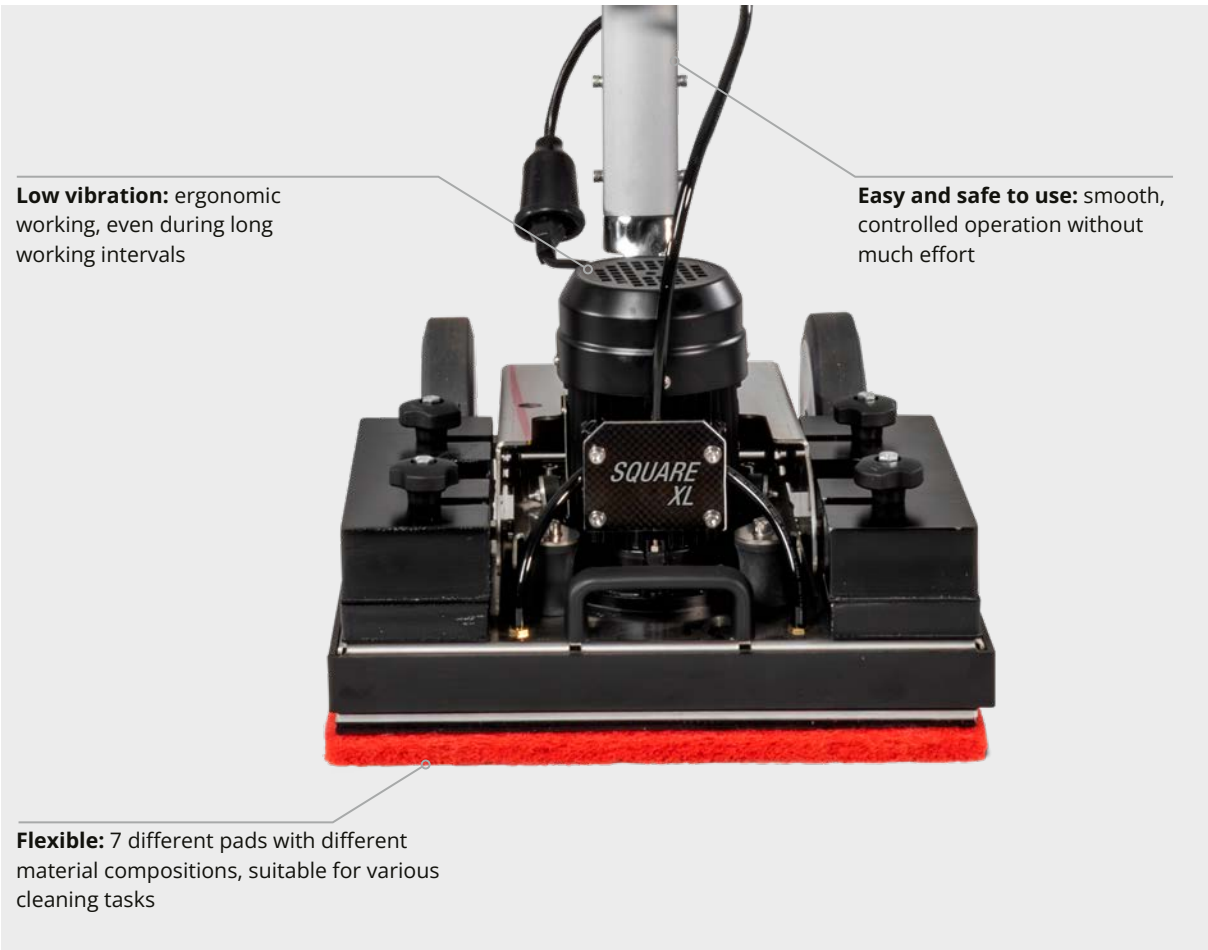

Easy transport: quick assembly and disassembly of weights

Robust & durable: complete mechanism made of metal, with brass parts that come into contact with water

Mobile: cordless cleaning with up to 65 minutes of runtime for maximum flexibility (Titan Square iGO)

Low vibration: ergonomic working, even during long working intervals

Easy and safe to use: smooth, controlled operation without much effort

Flexible: 7 different pads with different material compositions, suitable for various cleaning tasks

TORANA

Manoeuvrable and efficient for small areas.

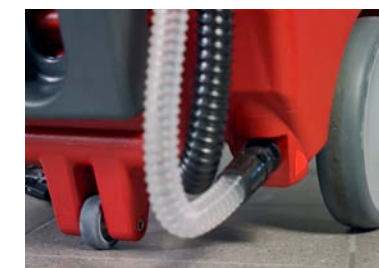

Battery powered 24 V floor scrubber dryer. Easy handling due to compact dimensions. Ideal for small and highly obstructed areas. Thanks to a brilliant vacuum system, places open to the public can also be cleaned during opening hours.

Running time: 75 minutes in normal mode. 120 minutes in ECO mode.

Comfortable brush ejection at the push of a button.

The machine can be easily transported via the support wheel.

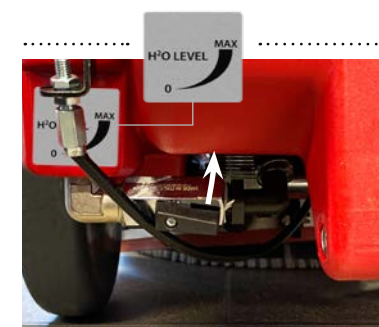

Rubber guard roller ensures damage-free cleaning performance along edges.

Suitability

For small to medium-sized areas. Area efficiency, approx. 1,260 m²/h. Excellent vacuum system. The floor is fully dried and can be walked on right away. Ideal for office buildings, the retail sector, catering, hotels, schools, nursing homes, showrooms, hospitals and fitness centers.

Features

- Beltless direct drive
- Suction bar automatically turns into the direction of workflow
- Swinging suspended brush adapts to any surface
- Evenly high brush pressure - 15 kg
- Battery operation: Battery life, approx. 75 min. under normal operation, and 120 min in ECO mode
- Pleasant, quiet running allows cleaning even during opening hours
- Area efficiency, approx. 1,260 m²/h
- Standard charge level indicator and integrated charger
- Two maintenance-free 33 Ah gel batteries

The water quantity can be adjusted for any floor covering.

Long lasting ball-bearing wheels.

Practical fresh water indicator.

Hygienic and easy-to-clean waste water tank.

The manoeuvrability of the TORANA makes it possible to use it in the very smallest of spaces. Ideal for highly obstructed areas.

- ① The operating height of the control unit can be ergonomically adjusted.
- ② Lift/drain the suction bar.
- ③ Fresh water fill level indicator.

The maintenance-free gel batteries can be removed without tools via quick-connect couplings.

The clean water tank can be fully drained.

The dirty water tank can be emptied via the drain hose.

Easy filling of the 15-litre clean water tank.

Pad holders and pads with different degrees of hardness.

Duo Pad Item-No. 210243

CAMIRA

Maximum performance for larger areas.

Battery operated, 24 V scrubber dryer. The machine, which is part of the 30-litre-class, convinces with a compact design and agility, which allows for extremely easy and efficient cleaning.

Equipped with two maintenance-free Sonnenschein gelbatteries with 50 Ah each, the running time is

about 120 minutes and the machine cleans quickly and effectively medium-sized areas of up to 1600 m². At a low battery level, the optional ECO mode can be activated and extends the running time of the machine when needed to conclude the cleaning task. The swiveling suction bar ensures an excellent suction power even during change of directions and the standard brush with a working width of 43 cm is perfect for a variety of cleaning tasks. The voluminous waste water tank, which can easily be cleaned due to its accessibility, is equipped with a user-friendly drain hose. The freshwater tank can also be drained completely and makes the CAMIRA with its "brushdrop" at the push of a button, a standard on-board charger, and its excellent price-performance-ratio one of the most user-friendly machines in its class.

The CAMIRA is perfectly suited for medium sized areas of up to 1600 m². Battery runtime of up to 120 minutes.

The standard eco-mode guarantees a longer battery runtime and greater coverage. To start the eco-mode, push the SMART RUN button for two seconds until the display starts to blink.

With the SMART RUN button, you can easily activate all functions. Brush speed, suction and water supply.

On-/off button.

Battery runtime display.

Suction and water supply can be turned on and off individually.

User-friendly, ergonomic operating device with all functions clearly displayed.

Suction bar swivels automatically into the working direction.

Rubber castors ensure a safe cleaning performance along edges.

Standard waste water drain hose.

① Working height can be adjusted individually.
② Lift and release squeegee.

The extremely narrow construction design guarantees a perfect handling and unique maneuverability.

Freshwater can be drained completely and comfortably with the fast closure system.

Water amounts can be adjusted individually to floor type.

Large, easy to clean waste water tank.

Internal charging station with battery runtime display.

Due to the support wheel, the machine can be transported easily.

Our brushes and pads

When cleaning with the single disc machines and floorscrubber dryers, besides the choice of the right cleaning machine, in particular the use of a suitable tool and the appropriate cleaning agent also plays a decisive role. In tools, a distinction is made between brushes and pads.

Here the rule is always that smooth flooring requires the use of a pad whereas textured flooring or floors with deep, wide joints require brushes. Both pads and brushes are available in various designs since the abrasiveness of the tool must suit the flooring.

Description		Floor	Single disc machines	Orbital machines	Eccentric machines	Floor scrubber dryers
Pads						
Pad white 	For dry polishing of treated floors. Removes light deposits on smooth and coated surfaces. Suitable for maintenance cleaning.	• Tiles • Coated floors • Polishing of wooden parquet oiled/sealed • Elastic floor coverings, e.g. linoleum, rubber, PVC, vinyl	☐	☐	☐	☐
Pad red 	Scouring pad for everyday use. The all-rounder for maintenance cleaning.	• Water-resistant floor coverings • Ground hard stone, e.g. granite • Polished natural stone, e.g. marble • Polished artificial stone, e.g. terrazzo • Elastic floor coverings, e.g. linoleum, rubber, PVC, vinyl	☐	☐	☒	☐
Pad green 	Abrasive cleaning pad for removing heavy to very heavy dirt. Suitable for basic cleaning and intermediate cleaning.	• Scratch-resistant floors • Linoleum • PVC • Wood parquet oiled/sealed • Hardwood decking	☐	☐	☐	☐
Pad black / brown strip 	Very abrasive cleaning pad for basic cleaning. Suitable for stripping floor coverings. Should only be used if the green pad does not produce the desired cleaning result.	• Very scratch-resistant floors • Polished granite • PVC with heavy incrustations • Concrete • Screed • Wood parquet sanding	☐	☐	☐	☐
Duo Pad 	For efficient intensive cleaning.	• Porcelain stoneware • Cast stone • Natural stone • Terracotta • Coated concrete • Textured safety tiles	☐	☐	☐	☐
Power Pad 	Durable all-rounder for all types of hard floor coverings.	• Tiles • Safety tiles • Stone floors • Porcelain stoneware • Concrete floors • Vinyl • PVC • Linoleum	☐	☐		
Queen Bonnet Pad 	Special pad for cleaning textile floor coverings and carpets. Used for superficial cleaning or quick visual improvement.	• Carpet coverings	☐	☐	☐	
Grasspad 	Very robust cleaning pad made from artificial turf material. Ideal for basic cleaning of heavily textured or uneven outdoor surfaces and for cleaning joints.	• Concrete • Natural stone • Terracotta • Travertine • Stainless steel • Non-slip tiles • Textured or uneven surfaces • Grout cleaning			☐	

The statements made are only recommendations. Because of the differences in flooring, a specialist test on the properties is essential.

Pads

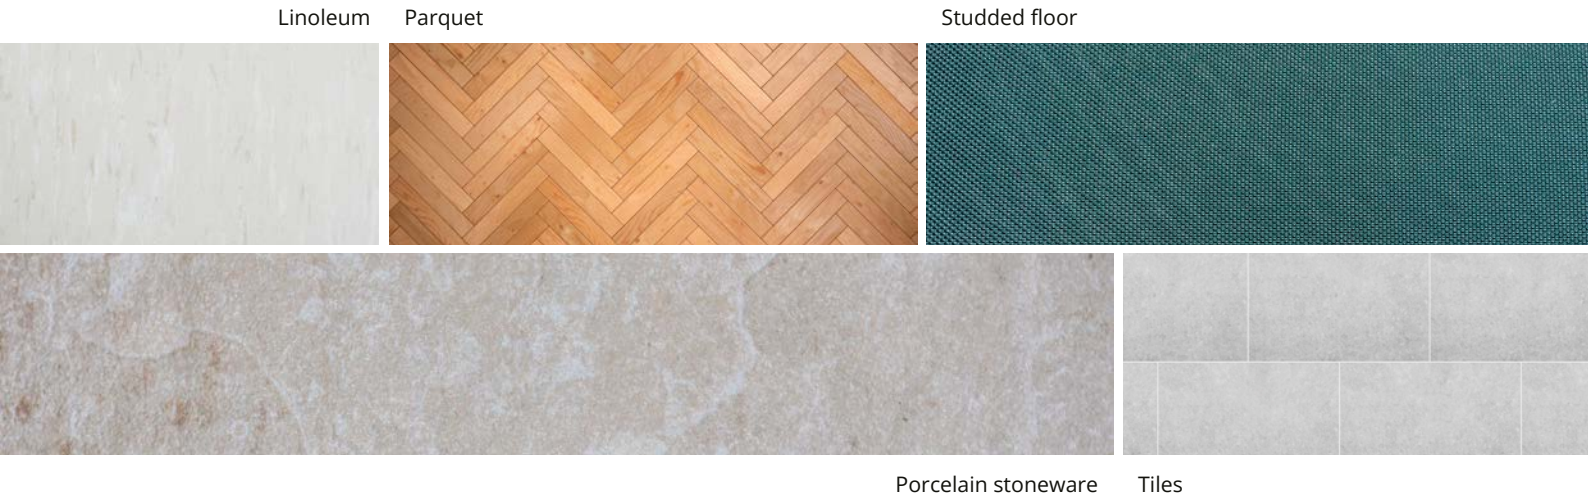

Pads are used for removing dirt or coatings and for polishing floors. We offer you scrubbing pads in white, red, green and black as well as special pads. The rule with the coloured pads is that the darker the pad, the more abrasive it is, the greater the abrasion. Care is recommended here since if a too-abrasive pad is used, this may cause damage and colour changes to the flooring.

Brushes

The following table provides assistance with selecting the right tool for machine cleaning of floors. We offer you brushes in various hardness grades appropriate to your flooring.

Description		Floor	Single disc machines	Orbital machines	Eccentric machines	Floor scrubber dryers
Brushes						
Brush soft 	The bristles are made of polypropylene.	• Slightly structured floor coverings • Aggregate concrete • Rubber stud floors • Floors with joints				☐
Brush medium 	The all-round brush with polypropylene bristles.	• All common waterproof, smooth and slightly structured surfaces with a medium degree of soiling				☒
Brush abrasive 	The hard, durable Tynex bristles are highly abrasive. This makes the brush suitable for removing stubborn dirt.	• Scratch-resistant floor coverings • Hard floor coverings				☐
Brush horsehair 	For polishing, often after the work step cleaning or waxing of floor coverings.	• Porcelain stoneware • Safety tiles				☐
Brush medium 	The all-round brush with polypropylene bristles.	• All common water-resistant surfaces with a medium degree of soiling • Smooth and slightly structured surfaces		☒	☐	
Brush soft 	For shampooing and cleaning soft floors.	• Soft floors • Sensitive floors		☒	☐	

The statements made are only recommendations. Because of the differences in flooring, a specialist test on the properties is essential.

SE 7

Spray-extraction cleaner with a separate anti-foaming tank.

Suggested Use

Designed for rug, carpet, and upholstery cleaning in offices, clinics, cinemas and households, as well as car upholstery.

With 4 bar spraying pressure and 230 mbar suction pressure, the SE 7 cleans quickly and thoroughly. The spray function can be turned on or off with the valve lever near the handle. The liquid levels of both the 6.5 litres fresh- and wastewater tanks can be checked at any time through the transparent lid of the device. Both tanks are separately removable for easy filling or emptying.

A third, integrated container allows the use of anti-foaming agent. The clear upholstery and floor nozzle allows free sight of the surface being cleaned and constant control over the process. Its ergonomic form guarantees effortless work.

The 7.5 m power cord ensures a large working range and can be rolled up on the cleaner handle after use. The body of the cleaner is made of impact-resistant plastic and is equipped with large, rubber-coated wheels, which leave no traces even on all sensitive surfaces.

Features

- Thorough cleaning through the 4 bar spray pressure and 230 mbar suction power
- Spray and extraction functions are separately operable
- Separate fresh- and wastewater tanks, each containing 6.5 L
- Separate container for anti-foaming agent
- Clear, ergonomic nozzles
- Long stainless steel vacuum tube for convenient, effortless work
- Rubber-coated castor wheels and large back wheels for streak-free work

Spray-and vacuum-function are separately switchable at the device.

A separate tank allows for the use of anti-foaming agent and guarantees problem-free work.

Large rubberwheels for silent running on tiles and mark free running on sensitive surfaces.

Technical Data:

CombiX Mini

Highlights

- ▶ Compact dimensions
- ▶ Rubber coated metal swivel casters
- ▶ Large rubber coated back-wheels
- ▶ Ergonomically designed push-handle
- ▶ Easy to fold and space-saving
- ▶ Colour coded buckets in 4 and 17 litres
- ▶ Storage slot with handle-holder for brooms, mop or the Medusa battery-sweeper
- ▶ Spacious storage trays
- ▶ 120 litres laundry- / waste bag
- ▶ Optional waste separation 2 x 60 litres available

Tip Starter Set contains the following:
1 x Purix Cleaning trolley
1 x Dry vacuum Cleaner Floory ZERO
1 x Magic Click mopholder
1 x Telescopic handle
10 x Premium Mop white/blue
1 x Warning sign
+ Waste separation
+ Storage tray 4-chamber Set
* Picture shows complete Starter Set.

PURIX

For hallway, bedroom and bathroom cleaning in public facilities, hotels, guesthouses, hospitals and nursing care. Colour-coded floor buckets, mounting for laundry or waste bags.

The PuriX in professional-graded quality consists in two robust plastic floor plates, the rear plate can be removed if necessary. The stable swivel casters and rubber-coated wheels are perfect for the requirements of daily, hard use. The lid on the laundry or waste bag can be conveniently operated from the ergonomic push handle. Mop or broom can be securely fixed in the built-in clip holder.

Integrated to the frame is a separate hanger for the warning sign. As standard, the PuriX is equipped with four buckets, a lateral mopdeposit, spacious 120 litres laundry / waste bag and a double bracket mop press.

Warning sign holder, the warning sign can be stored directly on the service cart.

Very easy to take out laundry or waste by using the zipper.

Side shelf for e.g. Medusa.

Optional accessories:

Storage tray 3-chamber set. Item-no. 301197

Storage tray 4-chamber set. Item-no. 301198

Robust metal mop press. Item-no. 301003

Accessories: Optional waste separation. Item-No. 301119
Tipp Standard in the complete set 301133, and Starter set 013032 & 013033.

PURIX PRO Lockable cleaning trolley for versatile use.

The compact, robust **Purix PRO** cleaning trolley is particularly impressive with its lockable doors. This makes it suitable not only for cleaning corridors, rooms and bathrooms in public facilities, offices or hotels, but also guarantees maximum safety in the healthcare sector.

The two lockable storage compartments provide sufficient storage space for cleaning agents and other utensils. The optional storage trays ensure order behind the doors. In addition, the Purix PRO is equipped with a holder for a laundry/waste bag.

The latter rests on a storage tray, which is reinforced by an additional wheel and can be removed if required. The cleaning trolley accommodates four large 5-litre buckets, which feature 4-color coding.

The Purix PRO is also equipped with two 17 litre buckets and a metal mop press. Sturdy metal swivel casters and large, rubberized rear wheels give the cleaning trolley stability and allow for easy, safe maneuvering around the facility.

Very easy to take out laundry or waste by using the zipper.

MATRIX

Lockable cleaning trolley in two versions.

The MatriX, optionally with mop press or mop boxes, impresses with perfect workmanship, an extremely solid and robust construction, as well as an excellent price-performance ratio. The extra-large interior has three pull-out trays and a storage grid and offers versatile storage space for cleaning agents or other utensils. The lockable door ensures maximum security in the property and guarantees a modern and discreet appearance at all times. Thanks to the large rubberised 100 mm swivel castors, the MatriX can be moved effortlessly and safely at all times, even when fully loaded. The rear swivel castors have two individually lockable parking brakes and secure the MatriX against unintentional rolling away when parked.

Disposal:

Laundry or waste can easily be removed using a zipper.

65 litre capacity.

Optional waste separation.
Item-no. 304024

Practical support surface and storage for cleaning plans.

Optional waste bag small.

VARIX ZERO series

Flexible. Secure.
Efficient.

Our goal: 'Zero emissions' – avoiding, reducing and completely offsetting CO₂ emissions.

Product with financial
climate contribution
ClimatePartner.com/17872-2510-1014

NEW FOR 2026

DISPOSAL UNIT

Customisable disposal unit including warning sign and multifunctional tool holder

SUPPLY UNIT

Flexibly adaptable supply unit for different requirements. Bucket can be placed on top or lowered into the lid. Easy to clean

CLEANING UNIT

with double-jaw mop press or mop boxes

The new VARiX ZERO series from SPRIiTUS combines maximum flexibility, maximum safety and efficient workflows in a well-designed cleaning trolley system. The new VariX ZERO generation consists of 13 different cleaning trolley models. These offer the perfect solution for every requirement – from classic building cleaning to healthcare and the hotel industry. Thanks to their modular design, the trolleys are perfectly tailored to the respective areas of application and spatial challenges. The supply and disposal units can be individually equipped with a wide range of accessories. This creates maximum flexibility for every type of property.

Another highlight: the VARiX ZERO series is manufactured in a particularly sustainable manner and contains – depending on the model – up to 80% regrain, without compromising on quality and stability, of course. In addition, the entire model series is offered as ZERO products with a financial climate contribution: based on the respective product carbon footprint, the CO₂ emissions caused are completely offset by supporting internationally recognised climate protection projects.

With its combination of functionality, sustainability and modern design, the VARiX ZERO series makes SPRIiTUS a strong partner for professional cleaning.

The right cleaning trolley for every application:
Facility Management, Health , Horeca

High-quality, compact and modular design with double-jaw mop press

The modular VARIx ZERO models impress with their compact design, double-jaw mop press, well thought-out functionality and flexible configuration options – ideal for versatile objects in professional building cleaning.

Our goal: 'Zero emissions' – avoiding, reducing and completely offsetting CO₂ emissions.

Sustainability

- Responsible and forward-looking
- ▶ **Recycled materials:** Up to 80% regranulate – highest quality and durability guaranteed.
 - ▶ **ZERO emissions:** The CO₂ emissions caused are fully offset by supporting internationally recognised climate protection projects.
 - ▶ **Flexible use:** The modular design allows for easy adjustments to changing requirements or a change of property.
 - ▶ **Robust and durable:** high-quality materials ensure lasting stability and dimensional stability.
 - ▶ **Reliable:** We ensure long-term availability of spare parts to guarantee continuous, trouble-free operation.
 - ▶ **Environmentally friendly:** All components can be properly recycled after use.

Spacious: generous storage space for cleaning products and other utensils – everything is within easy reach and neatly stowed away

Practical: integrated holders for conveniently carrying warning signs and other cleaning equipment

Customisable: Supply unit with double-jaw mop press or mop boxes – optionally for efficient building cleaning or hygienic requirements in the health-care sector

Intelligent hygiene concept with lockable doors and mop boxes

Lockable doors, two mop boxes, closed castors and smooth, easily disinfectable surfaces ensure maximum safety and hygiene – ideal for the healthcare sector.

Our goal: 'Zero emissions' – avoiding, reducing and completely offsetting CO₂ emissions.

MAGIC VARIO

Multifunctional for pocket and flap mops.

This multifunctional flat mop head with side flaps is unique in the world and is designed for ergonomic use and innovative handling. The Magic Vario saves you time and money thanks to its many practical details, and continues to look after your health.

Unlike any other folding mop holder on the market, the Vario has a unique patented upright function allowing it to be set down anywhere in the room at any time without leaning it against the wall or other objects. Your staff will not have to move around so much on a daily basis, and also gain in terms of safety by avoiding dangerous trip hazards and, as such, any resulting workplace hazards. This also does away with unnecessary streaks or marks on the wall, and bending down is reduced significantly. Excellent weight distribution makes the Vario extremely versatile, enables quick wiping even on areas with lots of furniture, and ensures a large area can be covered. High-quality design and balanced weight make it easy to use.

Mop holder (10 pieces/unit)		Item-No.
Magic Vario 40 cm		301128
Magic Vario 50 cm		301129
Optional accessories:		
Aluminium handle	1,40 m	301018
Telescopic handle Standard	0,80 - 1,45 m	301037
Telescopic handle PRO	0,96 - 1,75 m	301224
Spray handle		301218

- ① **Flexible:**
The particularly smooth redating joint enables easy pivoting in all directions and angles.
- ② **Simple:**
The folding head is extremely easy to open with the 2-stage foot pedal.
- ③ **Optionally:** in 40 or 50 cm width.
- ④ **Everyday help:**
Thanks to the innovative spread of the triangular shaped head, pocket mops can be stretched conveniently and in a vertical position.
- ⑤ **All-rounder:**
The Magic Vario is suitable for all types of pocket and flap mops. Flap mops heads are always held securely in place by the flaps.
- ⑥ **Comfortable:**
Press the cover out without touching it.
- ⑦ **Optional:**
Telescopic handle with economic grip for secure purchase, even with gloves. Quick release for easy height adjustment. Item-no. 301037
- ⑧ **Perfectly balanced:**
Extremely versatile and smooth folding head.
- ⑨ **Ingenious:**
The Magic Vario can be set down anywhere in the room at any time. The patented upright function is tested to 10,000 ratchet operations
- ⑩ **Hygienic:**
When nearly completely closed, the Magic Vario is extremely easy to clean.

MAGIC CLICK

Magnetic mop holder with patented upright function.

A smart solution with a big impact! Magic Click stands upright anywhere. No need to lean it against a wall.

The robust cardan joint can be pivoted all the way round for the figure 8 mopping technique and can be locked at any time so that the Magic Click can be left standing immediately and in any place.

No need to lean it against the wall or an object.

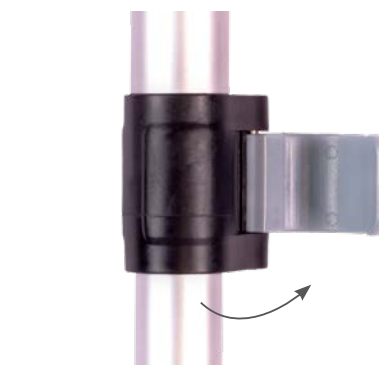

Goodbye to endless bending over to pick up the fallen mop. With Magic Click, you work effectively, quickly and consistently protect your back.

Magnetic-mop holder (10 pieces/unit)		Item-No.
Magic Click 40 cm		301039
Magic Click 50 cm		301040
Accessories		
Aluminium handle	1,40 m	301018
Telescopic handle Standard	0,80 - 1,45 m	301037
Telescopic handle PRO	0,96 - 1,75 m	301224
Spray handle		301218

Ergonomic, ribbed grip for secure holding, even through gloves.

Accessories::
telescopic handle, height-adjustable in range 0.80 - 1.45 m for setting to the optimum working height.
(Handle is not part of delivery content.)

Optional telescopic handle with Quick-action locking for simple height adjustment.

Strong magnetic catch with 5 kg closing force and automatic locking. The holder opens asymmetrically, thus facilitating threading into the mop pockets.

Shaft and holder are securely fixed with a stainless steel screw.

The click-action lock of the reliable self-standing function has been tested in a 10,000 action cycle.

All pivoting pins and screws are made of stainless steel.

The easy action redary joint enables easy turning in any direction and at any angle.

The snap-action holder can be easily opened with the large 2-stage foot switch.

Click
Optionally in 40 or 50 cm working width.

Excellent production quality and an optimally balanced intrinsic weight guarantee perfect mopping action and strain-free working.

VELC mop holder

Fast. Hygienic.
Efficient.

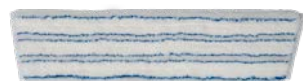

NEW FOR 2026

The new SPRINTUS velcro mop holder brings speed and precision to your cleaning. The sophisticated quick-change system allows you to easily change the mop covers without opening the holder – saving time and protecting your back. This makes the mop holder perfect for demanding hygiene environments such as hospitals.

Thanks to the innovative TriForce pressure rail – two outer velcro bars combined with a central plastic bar – the mop holder ensures optimum contact pressure. The result: a particularly even and streak-free mopping pattern.

Individually customisable in colour and with logo printing, it also offers attractive duo branding – ideal for companies that value their corporate identity. The velcro mop holder is available in two practical sizes – 40 and 60 cm – and is made of high-quality aluminium, which ensures durability and lightness.

Mop holder (10 pieces/unit)		Item-no.
VELC-40 - velcro mop holder		301451
VELC-60 - velcro mop holder		301452
Accessories:

Our mop covers

for efficient cleaning.

Maximum quality.

We process only selected materials of the highest quality. In doing so, we focus on top performance with maximum durability and service life.

Four-colour coding.

Our mop covers have a four-colour coding (red, green, blue, yellow). To mark a cover, the flags that are not needed are simply cut off.

Tear-resistant, padded pocket material.

Thanks to the padded pocket material, the covers can be installed easily with the mop holder. The water can drain off perfectly through the durable and robust pocket material. The pocket material is manufactured according to our high requirements and undergoes regular testing procedures.

Embroidered care instructions.

On a label embroidered directly on the cover, important care instructions are inherently stable and permanently visible.

Your customer logo.

Increase your brand recognition and have your mop covers individually printed with your logo, already upon the purchase of a single box.

The right mop cover for your floor.

Each floor type needs the right mop cover. We offer you the right product solution for every floor covering and degree of soiling.

Cotton mop 40 cm, with 4-colour system (75 pieces/unit)	302098
Cotton mop 50 cm, with 4-colour system (50 pieces/unit)	302099

We offer you two models of our traditional pocket mops as a combination of pocket and flap mop. This applies to the Premium PRO professional mop made of microfiber and the Classic PRO made of cotton. They combine the advantages of pure pocket mops and flap mops. If the mop cover is used as a pocket

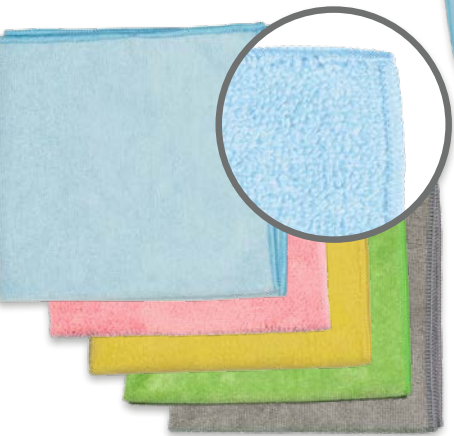

mop, it may be attached with ease with the mop holder during operation and in an upright position. As a flap mop, on the other hand, the user benefits from the fact that the mop cover is always held securely in position by the tension flaps. This permits contact-free wringing out of the mop.

Flap

Pocket

Microfiber cloth

Microfiber cloth “RAINBOW”

Universal cleaning cloth for wet and dry application with high water absorption. Guaranteed lint- and streak-free.

Your brand

Increase your brand recognition and focus on individualization in your corporate design.

ERA EVO ZERO, ERA TEC ZERO, ERA iGO ZERO, BoostiX ZERO, HydroX und CraftiX (XC)

From 10 pieces* with your logo.

With your personalised logo sign, you can make your brand visible everywhere – easily, flexibly and cost-effectively. We can deliver your vacuum cleaners individually labelled on request. In addition, devices can be assigned inventory numbers or allocated to specific users.

Particularly innovative: with the ERA PRO ZERO, customisation is done digitally via an app – quickly and intuitively.

Your brand, your product – completely customized straight from the factory!

Give your cleaning equipment your corporate design. For larger quantities, we offer complete customization – entirely according to your wishes:

- ☒ Your color
- ☒ Your logo
- ☒ Your instructions for use
- ☒ Your packaging
- ☒ Your rating label
- ☒ Your equipment

With our complete customization, your product becomes an ambassador for your brand.

Mops with logo print

You can choose from all SPRiNTUS microfiber and cotton covers (except flap covers) and have them individually printed with your logo for orders of one box* or more. In this special printing process, your company logo is integrated directly into the fibers and is scratch- and wash-resistant.

*40 cm = 75 pieces per box, 50 cm = 50 pieces per box

Custom order - custom made including embroidered labels.

If you cannot find what you are looking for in our range, please contact us. We have a large selection of materials, which we can customise and produce to suit the respective area of application and your individual requirements. In addition, we can offer any type and special size on request, as well as colour changes and coding that meet your requirements and areas of application.

Velcro holders as unique as your company

Make an impression with your velcro mop holders! Anodized high-quality aluminum and custom logo printing ensure that your mop holder perfectly matches your corporate design.
