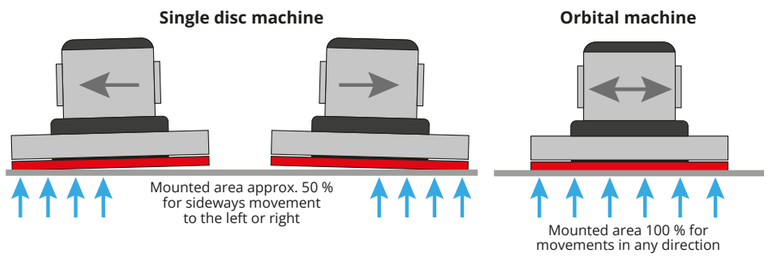
TITAN

SPRiNTUS

High-performance orbital machine with excellent cleaning results and safe operation.

The orbital technology combines two types of motion to achieve a higher mechanical cleaning effect while reducing the use of chemistry and protecting the environment. The interplay of eccentric and rotating movements generates a special efficient cleaning pattern and thus differs from classic single-disc machines, which perform a pure rotational movement. In terms of smooth running, the orbital method also has a very positive effect on handling and makes it possible to drive the machine in a safe and fatigue-free manner at all times. Even inexperienced users can quickly become familiar with the Titan and achieve excellent work results in the shortest possible time. The areas of application in basic and maintenance cleaning, polishing, and scrubbing on all floor coverings (carpet, stone, PVC, wood, safety tiles) are almost limitless.



Advantages of the orbital machine in comparison to a single-disc machine:

- less water
- less chemicals
- less time
- less effort
- contact surface area 100 % (see right)

Thanks to significantly higher mechanical cleaning effect!

Tilting drawbar for increasing the contact pressure.

Motor protection cover protects the motor from moisture.

Technical Data:	
Voltage	220-240 V / 50 Hz
Max. Power	1100 W
Sound pressure level	56 dB(A)
Brush speed approx.	60 rpm 1500 Oscillations/min.
Max. disk diameter	17″ / 432 mm
Diameter pad holder	16-17″
Freshwater container	12 Litres
Weight	46 kg
Length of power cord	12 m
Additional weight	12 kg

Excellent stairway mobility and stability.

Optional additional weight, 12 kg.
Item-no. 207119

Accessories

Pad holder.
Item-No. 207113

Power Pad for all surfaces.
Item-No. 201076

Brush medium.
Item-No. 207115
